

Disability Support Pension (**DSP**) recipients as at 16 August 2019 with Migraine as one of their 10 highest rated medical conditions assessed (in terms of impact on job capacity) as part of the recipient's latest qualifying medical assessment: **14,176**

This represents **1.9%** of the total DSP population as at 16 August 2019.

Please note that the above results relate to DSP recipients whose claim involved a medical assessment as part of that process. If the condition was not disclosed in the medical information provided in support of the claim, the above results would not include those customers.
