Our Ref: FOI-1920/92.05

Dear Mr Friedlander

Request for Information

Thank you for your email sent 13 July 2020 providing clarification of your request.

I understand that your request currently stands as follows:

"a copy of an electronic document (spreadsheet, database extract, or similar) showing the location and distribution area (a string of the form [four letters]:[number]) of all existing FTTN cabinets as at 22 June 2020."

You have further clarified that you would still desire the information without "distribution area" codes if these cannot be released, and that you are flexible on the date of the information.

I have consulted with **nbn** subject matter experts I understand that the processing time and therefore fee may be affected by the degree of detail to which you seek the document to show location. As there are a number of alternatives, what you mean by "location" is an issue which requires clarification in any event before **nbn** can process your request.

Could you please clarify the format of location data you seek, such as: street address, geospatial location, or latitude/longitude. For your reference, street address is likely to involve the lease processing time and therefore the lowest charges.

In the meantime, I refer you again to my comments in my earlier correspondence regarding **nbn's** commercial activities carve-out (**CAC**). While I have not reviewed any requested documents, I note there is a possibility that the CAC may apply to your request.

If you would like to discuss your request with me, please contact me on (02) 9031 3022.

I await your response.

Yours sincerely

Rohan Singh
