Hello Tim!

I hope you're well. s 47F gave me your email in order to contact you regarding challenging indigenous activists, using the provisions of 18(c). Obviously I am deeply opposed to 18(c). It is an anathema to a modern liberal society.

However, there needs to be a push back against the extreme aboriginal activists who are going completely unopposed. As outlined in the email to s 47F I want to explore an understanding of how I'm denigrated and offended by being a non-aboriginal. When aboriginal activists attribute the plight of and socio-economic well-being of aboriginals to racism by or even structural-racism on the part of non-aboriginals that is casting a general offensive and untrue assertion on a whole racial group (non-aboriginals).

Of course non-aboriginal is not a race per se, but I am the recipient of offensive untrue assertions on the basis of my race (that I am non-aboriginal); note the difference between the concepts

Racism is not the cause of the indices of poor aboriginal socio-economic status. Alcohol abuse, drug and solvent abuse, domestic violence, high offending rates, fetal alcohol syndrome, poor educational achievement, poor health status, etc are not caused by racism or structural racism. They are not imposed from without. Those indices are all an indications of a failed culture. of

Compare the rise of other ethnic groups who started with low socio-economic status and how they have risen.

We could argue the cause of all those indices of socio-economic to the end of the world. But racist like Stan Grant clearly make offensive comments about broad swathes of the Australian community based on his opinion of people whose race is non-aboriginal

Stan Grant specifically says "Of course racism is killing the Australian dream! It is self evident that it is killing the Australian dream"

It is clear throughout his speech that he is not talking about the racism of aborigines. He is saying that non-aboriginal people are racist. That is offensive. There are endless examples of "hate" speech against non-aboriginal Australians. The common factor being race.

Otherwise I hope you're enjoy the role. It is a vital job you are doing too!!

Kind regards,

s 47F

Hi s 47F

Exactly! But what you're talking about we can't talk about in case someone finds it offensive...

Yes - please drop Tim an email - s 47F - his email is

Tim.Wilson@humanrights.gov.au or just give him a tingle on the mobile - his number is s 47F

I hope you are flourishing!

kind regards s 47F

Subject: Indigenous affairs and 18(c)

Hello s 47F

I hope you're well. I was wondering if you have an email for Tim Wilson. I'm assuming emails to his old IPA email address would no longer be forwarded to him.

I wanted to get his advice, particularly in his capacity within the Human Rights Commission, regarding how to define the race of non-indigenous citizens. Of course "non-indigenous" is not a race per se. But many of the aggressive aboriginal activists make claims about how non-indigenous people are responsible for the plight of aboriginal people. Simply on the basis of my race (i.e. non-aboriginal), they make broad sweeping statements that non-aboriginal people are in anyway racist or contributing to the plight of aboriginal people. I am offended by that.

So there is a subtle difference between a racial grouping per se, and being offended or discriminated against on the basis of race.

I haven't read the full transcript of Stan Grant's rant, but the exerts are not only intellectually feeble, but deeply offensive to non-indigenous people. Every index of aboriginal well-being that Stan Grant describes is a factor of a failed indigenous culture, not racism on behalf of non-aboriginal people.

As you so correctly pointed out in your weekly email, 18(c) is going to completely shut down debate on aboriginal recognition and indigenous affairs in general.

We need to push back. We are allowing an unfettered and unopposed voice by the looniest of aboriginal activists. They need to feel the wrath of 18(c) when they speak out! Of course what we need is to completely get rid of 18(c), but until then we need to push back.

Keep up the good work, we desperately need it!

Kind regards,

s 47F

11 Days to Go - s 47F likely to cost Turnbull 50 Rep seats & 12 senate spots
- small parties & indys likely to control both houses

**History is being created at s 47F
pre-polling at s 47F**

Yesterday, a busker turned up with following brochure (attached)
candidates present started reading - smiling - understanding immediately!
High-profile MP (no names mentioned) even started singing CCR songs with busker.

s 47F **was about to get up to \$13.68 billion
injection into s 47F Economy -**

that no other Australian Electorate would receive - from the busker.
Neither the ALP or Liberals are able to match the busker's amazing offer... have a read...
150,000 A5 fliers the busker is circulating across s 47F Electorate in 10 days!

Good luck with your campaign - only 11 days to go!=-O

More tomorrow... or reply with unsubscribe in subject line

4 “below belt” FAQs all 9 absolutely “I☑♥e” answering!

(Eg. if voters are waiting & bored, & can discuss direct for half an hour in *pre-poll babe-kissing queue!*©)

**1. ELECTORATE SPREADSHEET! Hey s 47F “Friend”! WHERE IS s 47F
MONTHLY SPREADSHEET SHOWING 100% OF TAX PAID / SPENT IN
ELECTORATE? For every electorate? To compare? DO PM'S VOTERS GET
PREFERENTIAL \$\$\$?**

**2. BLIND NO SPREADSHEET DECISION-MAKING! Ask s 47F etc their blind
decision-making preferences? a. pin tail on donkey? b. spin bottle? c. flip a coin? d. ask
party whip? e. all of above? Hey s 47F! WHY FORCE VOTERS TO MAKE BLIND
DECISIONS TOO?**

3. **\$13.64 BILLION** s 47F **ELECTORATE SUPER FUND!** Aus \$Super is more than **\$2 TRILLION OR AV \$13.64 BILLION / ELECTORATE!** Hey s 47F! Why haven't you or any s 47F since 1975 helped set up 1+ electorate owned & controlled super fund to **EMPOWER VOTERS TO STRENGTHEN / GROW** s 47F **ECONOMY? WILL OUR NEXT MP RESIGN** if local super fund isn't established **WITHIN 90 DAYS OF ELECTION?**

4. **HOW CAN CAIRNS CENTRELINKERS EVER BE HOMELESSNESS? Fact!** Any unable to budget may voluntarily opt into Adult Admin. QCAT appoints Adult Admin. eg. Qld Public Trust. Eg, PT receives benefit, pays rent, elect, wkly tobacco etc. PT can even provide 6 smaller pays / fortnight! **POLICE MAY APPLY FOR INVOLUNTARY RE CRIMES! SO NEVER BLAME LAW-ABIDING HOMELESS** for 1000s of Cairns CBD assaults / wk!

I'm not a member of any political party. Just a s 47F having pre-election say! Lookin forward to comments on: "Once upon an election time... Aussie voters took cricket bats into polling booths..."

s 47F

s 47F

Once upon an election time... Aussie voters took cricket bats into polling booths...

and while marking ballot papers... polling booth busker's song sunk in...

*never vote for an MP... without a monthly spreadsheet...
to account for taxes paid... and spent in your electorate...*

what have they got to hide... what have they got to hide...

And not one incumbent MP or candidate from a major political party was elected that year!
Services not needed! **All wacked out of oval for six!**

**And the sun did rise the next day! And the sky hadn't fallen in.
That's democracy!**

Following federal election... all 150 federal electorates had an **EGA - ELECTORATE GOVERNING ASSEMBLY©** that perpetually met quarterly - 3rd Sat middle month of each quarter.. celebrate & **REVIEW PERFORMANCE OF PREVIOUS QUARTER'S WHOLE COMMUNITY LEADERSHIP**. Under-performers quietly resigning avoiding sack!

And at 1pm (local time) on **2ND TUES OF EACH MONTH WITHOUT FAIL**, like manna from Heaven, every electorate had **COMPLETE & AUDITED SPREADSHEETS PUBLISHED ONLINE OF EVERY CENT OF TAXES SPENT & COLLECTED** - not only **IN THEIR OWN ELECTORATE** - but in every electorate in Australia.

Before next election, all 150 electorate **EGAS DECIDED IN AEC- CONDUCTED BALLOTS TO INCORPORATE, ESTABLISHING SEPARATE EGA TREASURIES... RESOURCE REGISTERS... SOVEREIGN OWNERSHIP OF GOV ELECTORATE LAND**.

Voters especially loved **PAYING ALL FED GOV TAXES & CHARGES INTO OWN ELECTORATE EGA TREASURY**. Only forwarding to fed treasury taxes needed to fund the **BASICS NEEDED TO PERFORM FUNCTIONS OF A MODERN, LEAN, PRODUCTIVE, PEACE-LOVING FED GOV. TAXES DROPPED 60% IN 4 YEARS!!!**

And all 150 EGAs set up **ELECTORATE OWNED, MANAGED & CONTROLLED SUPER FUNDS** each starting with an average of **\$13.64 BILLION PER EGA**. As well as **EGA-OWNED & CONTROLLED INSURANCE FUNDS & BANKS**.

By next fed election, every electorate had virtually **FULL EMPLOYMENT. HOUSING AFFORDABILITY** for all. **NO SHORTAGE OF INFRASTRUCTURE FUNDING** in any electorate! **UNI GRADS BETTER JOBS. MOST SOON PAID OFF ALL HECS FEES!**

Shopping centres, ports & airports were soon **OWNED LOCALLY**, & as **FAMILIES TOO BUSY GOING CAMPING, HAVING FUN & playing sports on weekends, CBD SHOPS & SHOPPING CENTRES CLOSED MIDDAY SAT** re-opening Mon mornings.

MANY COUPLES CHOSE TO BE SINGLE INCOME FAMILIES HAVING LARGER FAMILIES.

MORE CHOSE TO GET MARRIED strengthening low-crime suburbs.

On **25TH YEAR OF EVERY CENTURY** until end of time, EGAs **MUST** conduct ballots to decide if it is **STILL VIABLE** for each EGA to continue as a whole for next 25 years... or **ABSOLUTELY ESSENTIAL** for any EGA to divide incorporating 2 new legal entities. Why? Because **IN EVERY GENERATION, FAMILIES MUST DIVIDE... FORM NEW FAMILIES... TO GROW & STRENGTHEN WHOLE FAMILY.** *Via musicum locuta est!©*

Hi Tim,

I had a quick chat with you before the s 47F Here's the s 47F economics exercise I referred to. Common sense coming in ahead of ideology, I thought, and it clearly worked well.

As I have an s 47F grandson at a state primary school, I'm well aware of what he's absorbing. If you and s 47F between you can quietly redirect a few things, I'm one person who would appreciate it.

As I said last Thursday, back in s 47F F
I learnt a lot and s 47F

s 47F
s 47F

s 47F

I saw you in the distance at s 47F the following day. Now that was really something. It was great to hear s 47F (and have the chance to s 47F). She's in the same collaborative mould as s 47F, something all sides prefer.

s 47F

Next time we meet up I would hope to spend more time, finding out what you do and why you do it.

Regards,

s 47F

s 47F

Dear s 47F

It's s 47F from the s 47F.

s 47F

I'd like to share them with you.

The first happened with my s 47F the day after the federal budget. I was pleasantly surprised to hear that they believed a responsible government should tackle Australia's ballooning debt now, not later.

They thought cutting government spending, not increasing taxes, was the best way to do this. And they thought a fair budget encouraged and rewarded people in our society who work hard.

The second moment happened while I was s 47F s 47F a video of the IPA's James Paterson debating Tim Costello on the best way to lift people out of poverty — foreign aid, or economic freedom.

At the end of the video, having made no comment myself, s 47F believed that James was right.

Children are not born believing that free markets are bad, that government is the answer to all of society's problems, or that protecting the environment is more important than economic growth.

s 47F shows that when presented with research and evidence, young people embrace our values. They can see, just as we can, that freedom changes lives.

This is what the s does best. And the s is reaching more young people than ever before through a sophisticated social media campaign.

s 47F

Kind regards

s 47F

Fellas, you are all trying for the best, but what a schemozzle. Tim and s 47F, what can you do to work with s 47F and the IPA to do better? Tim, congrats, all the best in parliament, you are up against relative midgets, but read Harold Wilson's *On Prime Ministers*. Midgets win too often, and all the time in Australia since John Howard. We have to do better.

s 47F go for a long walk or a sabbatical and have a big think. You are worth your weight in gold, but just buggerising about. It was said that Wagner's music is much better than it sounds. You are much better than you sound, but you need to go away and think for another twenty years.

s 47F, who has lived hundreds of years longer than you lot.

s 47F
AUSTRALIAN LABOR PARTY, Parliament House Canberra

GENTLEMEN,

LETTER below to s 47F and Liberal Politicians from s 47F
Ignored by COALITION, MASSIVE GOVERNMENT COVER UP, of hidden left wing treaty

I felt it important that I include Labor politicians, in the publics exposing the cover up , of the evil United Nations Agenda 21, and the tithing of billions of Australuan tax dollars for unenforceable TREATYS which hurt the Australian democratic process

Both Left wing Liberal and Labor politicians are in collusion in implementing this unenforceable United Nations treaty, you all are educated people, so you obviously are part of a most evil, organised plot to ruin the way of life of the western democratic processes in this country

The letter below, is ignored by the people it's written to, however there is a new paradigm, THE EMPIRE IS STRIKING BACK, THERE IS A STORM BREWING ! The Australian Alliance party are the ones who are listening, and will gradually form a new Australian political process, as our people wake up, gradually, one by one to what you are doing to destroy our country

The National Party and some Liberals and independent Senators will not be silenced.

Best wishes For 2016 election, a VERY BUMPY RIDE in store as the Australian people wake up,
One by one, inch by inch.

Best wishes

Subject: SDG Agenda

s 47F

Dear s 47F

The UN's 2015-2030 agenda was born in 2012 at the [Agenda 21 Rio +20 Conference](#) which was [attended by then Prime Minister Julia Gillard](#). Details of that commitment were recorded in the outcomes document from Rio +20 entitled, ["The Future We Want"](#). When Australia signed up at Rio+20 we also signed up for the [Sustainable Development Goals and the post-2015 agenda](#) which is both a [continuation of, and expansion of, Agenda 21](#):

“We further recognize the importance and utility of a set of sustainable development goals (SDGs), which are based on Agenda 21 and Johannesburg Plan of Implementation, fully respect all Rio Principles, taking into account different national circumstances, capacities and priorities, are consistent with international law, build upon commitments already made, and contribute to the full implementation of the outcomes of all major Summits in the economic, social and environmental fields, including this outcome document. These goals should address and incorporate in a balanced way all three dimensions of sustainable development and their inter-linkages. They should be coherent with and integrated in the United Nations Development Agenda beyond 2015, thus contributing to the achievement of sustainable development and serving as a driver for implementation and mainstreaming of sustainable development in the United Nations system as a whole. The development of these goals should not divert focus or effort from the achievement of the Millennium Development Goals.....We also underscore that SDGs should be action-oriented, concise and easy to communicate, limited in number, aspirational, global in nature and universally applicable to all countries.....We resolve to establish an inclusive and transparent intergovernmental process on SDGs that is open to all stakeholders with a view to developing global sustainable development goals to be agreed by the United Nations General Assembly.....The process needs to be coordinated and coherent with the processes considering the post-2015 development agenda.”

As the [Australian government admits on their web site about CSD](#), “Australia's commitment to Agenda 21 is reflected in a strong national response to meet our obligations under this international agreement.” And as the Australian government also admits in their [“Road to Rio+20” fact sheet](#), they have been busy forcing Australian citizens to comply with the dictates of the UN and their ‘non-binding’ Agenda 21 program:

“Australia has participated in sustainable development discussions for more than four decades. We have signed international treaties, supported regional initiatives and enacted international commitments through new laws and policies at home”

Though Agenda 21 was described as ‘voluntary’ or ‘non-binding’, successive Australian governments nevertheless legislated to force Australians to comply with fundamental provisions of this UN agreement, even though refusing to give voters a democratic choice for 23 years. Will the government be doing the same with the 2030 agreement?

The Australian government [recently emphasised the importance of community involvement in response to the UN survey](#):

Australia considers that all stakeholders should be actively encouraged to participate in follow up and review, including civil society, the private sector, multilateral development organisations, and the academic and scientific community. Our vision for the HLPF would see all stakeholders engaged in speaking roles, running side events, and participating in interactive sessions to contribute their ideas and analysis into follow up and review discussions.

Will the government be taking the matter to the people for democratic approval, or will the people be denied any democratic choice?

[As Secretary-General Ban Ki-moon pointed out](#) in regard to their global agenda, we must forget about national boundaries for the greater global good. Do you agree?

Can you also clarify the final goals and final costs of the UN's 2030 agenda, which, [as in the case of Agenda 21](#), remain unspecified and open ended? It has been suggested that funds could come from "[disarmament](#)" or a [team of global tax inspectors which could raise "trillions"](#). Is this correct?

The UN has emphasised the importance of national data and statistics to ensure effective monitoring and compliance. Australia has eagerly pledged the support of the ABS for this purpose. Can you detail the activities of the ABS in this respect?

Given the importance of these issues, and your desire for community involvement, I look forward to a prompt and detailed response.

Regards

Yeah. It was the same when I was there a month ago. I was talking to some Americans about how it felt post-9/11 and they recounted similar experiences to mine. It does feel like people are finally figuring out 9/11 wasn't a one off and we have a very serious problem which can't be wished away through pacificism. I have a funny feeling we can kiss economic growth goodbye for a while. We are about to spend a lot of money on broken windows.

Back Sunday. Leave Strasbourg tomorrow. Two sets of two weeks in two months of travel for work is too long. Especially when you're surrounded by a terrorist attack. Quite a strange experience. Because you don't know what is happening at the time, you kind of reconcile that this may be the end. And then it isn't, and you have to come back from that.

FYI, attached article on the Tassie situation that will be in the Weekend Aus.

I can't comment on a case as it is ongoing. But I can certainly critique the law.

This is where, with respect, Dominic Perrottet got it wrong. The issue is the law, not the Commissioner, just like 18C. The law basically requires the complain to be accepted.

Hodgman indicated today that he is likely to review the Act in light of this complaint. It'll be in tomorrow's paper.

Best,

Tim

Dear Tim,

Thank you for your reply.

I have witnessed situations on the workfloor, where 457 visa holders were working 12 hrs a day, getting paid 8 during the busy times. For weeks on end, and repeatedly. It always irked me that I (as a contractor) was treated way better than the 457-visa based permanent employee colleagues doing the same job. More and more so, as I started to understand why these kids were vulnerable to, what is basically, exploitation.

They could not do this to me and they didn't. To the 457 visa holder they could, and did.

The problem is the visa.

Currently the employer is involved, through sponsoring, in the decision whether 457 visa holders can stay in Australia. The more desperate the situation the 457 visa holder would have to go back to upon cancellation of the visa, the more they'd be willing to do to avoid going back. The visa is therefore constructed such that the employer, if so inclined, can cream off that extra effort caused by the desire to stay in Australia by the threat of withdrawing sponsoring. And that is happening.

In short: the 457 visa's have been set up such that the most desperate, are the most vulnerable. And the most ruthless employers, are the most profitable. What could possibly go wrong?

I am perfectly happy to explain further - put together a couple of powerpoint slides and talk you through it, for example, by phone or in person.

Also, I have a number of colleagues who are, or have been, in this situation. I am very happy to contact them to see if they are willing to talk to you or your guys about their experiences, or they might know someone who is right now going through something like this.

Please let me know how I can best assist.

Would this not be an interesting topic for Tim Wilson?

Employers are just mere mortals, just like the rest of us: some good, some bad. We all deal with that. But they cannot do this stuff to you and me.

So the key question is: **why are employers able to treat temp visa holders differently?**

Only one answer: because of the restrictions of the visa.

These people don't need protection from dodgy employers, they need protection from dodgy visas.

There is a rule-of-law aspect to this. There is coercion involved here: the employers would not be able to do this without an assist from the state.

Tim might be interested. Or perhaps the IPA itself?

Any which way: if anyone wants to get involved, the time to pipe up is now - if we are to use the media attention the government is generating against it :-)

<http://www.theage.com.au/federal-politics/political-news/coalition-considering-a-crackdown-on-dodgy-bosses-exploiting-foreign-workers-20151014-gk8u6e.html>

...high-level "ministerial working group protecting vulnerable visa holders"... crackdown...

It's Orwellian. It is how they set up the visas, that is **making** these people vulnerable.

De-couple the visa completely from the employer: visa holder can stay for the duration of the visa, regardless of employment status, hours worked per week, etc..

That way the visa holder is independent; not vulnerable to coercion by the employer. The visa holder can compete in the labour market on an equal footing with everyone else. That is all they need to do.

I bet that is not going to be the conclusion, though....

Subject: FW: Indigenous affairs and 18(c)

Hello Tim!

I hope you're well. s 47F gave me your email in order to contact you regarding challenging indigenous activists, using the provisions of 18(c). Obviously I am deeply opposed to 18(c). It is an anathema to a modern liberal society.

However, there needs to be a push back against the extreme aboriginal activists who are going completely unopposed. As outlined in the email to s 47F I want to explore an understanding of how I'm denigrated and offended by being a non-aboriginal. When aboriginal activists attribute the plight of and socio-economic well-being of aboriginals to racism by or even structural-racism on the part of non-aboriginals that is casting a general offensive and untrue assertion on a whole racial group (non-aboriginals).

Of course non-aboriginal is not a race per se, but I am the recipient of offensive untrue assertions on the basis of my race (that I am non-aboriginal); note the difference between the concepts

Racism is not the cause of the indices of poor aboriginal socio-economic status. Alcohol abuse, drug and solvent abuse, domestic violence, high offending rates, fetal alcohol syndrome, poor educational achievement, poor health status, etc are not caused by racism or structural racism. They are not imposed from without. Those indices are all an indications of a failed culture. of

Compare the rise of other ethnic groups who started with low socio-economic status and how they have risen.

We could argue the cause of all those indices of socio-economic to the end of the world. But racist like Stan Grant clearly make offensive comments about broad swathes of the Australian community based on his opinion of people whose race is non-aboriginal

Stan Grant specifically says "Of course racism is killing the Australian dream! It is self evident that it is killing the Australian dream"

It is clear throughout his speech that he is not talking about the racism of aborigines. He is saying that non-aboriginal people are racist. That is offensive. There are endless examples of "hate" speech against non-aboriginal Australians. The common factor being race.

Otherwise I hope you're enjoy the role. It is a vital job you are doing too!!

Kind regards,

S

Hi S 47F

Exactly! But what you're talking about we can't talk about in case someone finds it offensive...

Yes - please drop Tim an email - he'd be really interested in your views - his email is

Tim.Wilson@humanrights.gov.au or just give him a tingle on the mobile - his number is S 47F.

I hope you are flourishing!

kind regards S

Subject: Indigenous affairs and 18(c)
Hello S 47F

I hope you're well. I was wondering if you have an email for Tim Wilson. I'm assuming emails to his old IPA email address would no longer be forwarded to him.

I wanted to get his advice, particularly in his capacity within the Human Rights Commission, regarding how to define the race of non-indigenous citizens. Of course "non-indigenous" is not a race per se. But many of the aggressive aboriginal activists make claims about how non-indigenous people are responsible for the plight of aboriginal people. Simply on the basis of my race (i.e. non-aboriginal), they make broad sweeping statements that non-aboriginal people are in anyway racist or contributing to the plight of aboriginal people. I am offended by that.

So there is a subtle difference between a racial grouping per se, and being offended or discriminated against on the basis of race.

I haven't read the full transcript of Stan Grant's rant, but the exerts are not only intellectually feeble, but deeply offensive to non-indigenous people. Every index of aboriginal well-being that Stan Grant describes is a factor of a failed indigenous culture, not racism on behalf of non-aboriginal people.

As you so correctly pointed out in your weekly email, 18(c) is going to completely shut down debate on aboriginal recognition and indigenous affairs in general.

We need to push back. We are allowing an unfettered and unopposed voice by the looniest of aboriginal activists. They need to feel the wrath of 18(c) when they speak out! Of course what we need is to completely get rid of 18(c), but until then we need to push back.
Keep up the good work, we desperately need it!
Kind regards,

S

Mass-murderer Castro dies unpunished

By Augusto Zimmermann on December 7, 2016

If there is a Latin American nation in which human rights and the rule of law seem to have completely vanished, that nation certainly is Cuba. And yet the recently deceased dictator Fidel Castro remains revered by those who regard him as a revolutionary hero who bravely stood against 'capitalism' and 'American imperialism'. Amongst these leftist admirers of Castro are the Prime Minister of Canada, Justin Trudeau and the leader of the Opposition in Australia, Bill Shorten. Mr Shorten has been to Cuba and he deeply admired a notorious six-hour speech delivered by Castro. 'It was amazing,' Shorten said. Of course, he is not the only Labor leader to deeply admire the brutal dictator. British Labour leader Jeremy Corbyn said Castro was a 'champion of social justice' — a nonsensical statement given all the people Castro brutally murdered and all the human rights he grossly violated....

Back Sunday. Leave Strasbourg tomorrow. Two sets of two weeks in two months of travel for work is too long. Especially when you're surrounded by a terrorist attack. Quite a strange experience. Because you don't know what is happening at the time, you kind of reconcile that this may be the end. And then it isn't, and you have to come back from that.

FYI, attached article on the Tassie situation that will be in the Weekend Aus.

I can't comment on a case as it is ongoing. But I can certainly critique the law.

This is where, with respect, Dominic Perrottet got it wrong. The issue is the law, not the Commissioner, just like 18C. The law basically requires the complain to be accepted.

Hodgman indicated today that he is likely to review the Act in light of this complaint. It'll be in tomorrow's paper.

Best,

Tim

Yeah. It was the same when I was there a month ago. I was talking to some Americans about how it felt post-9/11 and they recounted similar experiences to mine. It does feel like people are finally figuring out 9/11 wasn't a one off and we have a very serious problem which can't be wished away through pacificism. I have a funny feeling we can kiss economic growth goodbye for a while. We are about to spend a lot of money on broken windows.

Subject: Fwd: 151118 - ARTICLE - The problem with over-reaching anti-discrimination law [SEC=UNCLASSIFIED]

FYI, attached article on the Tassie situation that will be in the Weekend Aus.

I can't comment on a case as it is ongoing. But I can certainly critique the law.

This is where, with respect, Dominic Perrottet got it wrong. The issue is the law, not the Commissioner, just like 18C. The law basically requires the complain to be accepted.

Hodgman indicated today that he is likely to review the Act in light of this complaint. It'll be in tomorrow's paper.

Best,

Tim

It usually works the other way. Politicians or more often their advisors slave away for years brown nosing the usual suspects so they can leave and luxuriate in some appointed statutory position often for life or some other long period of time. For instance if one were to delve deeper into the government's proposed new regulatory authority over unions, which will of course need a new board of Commissioners, (why not just give the job to ASIC?) you will find that the originator of the arrangement will have lined up one of the board roles for himself.

Most people can't even imagine having an income of \$400k let alone voluntarily giving it's up. For what it is worth the only difference between \$400k and 4 or 5 times that figure is the size of the exclamation you give when your accountant tells you how much extra tax you have to pay. Life's style doesn't change that much. You can only eat three meals a day and sleep in one bed at a time etc etc

So more power to you for giving up the "cushy" for the unpredictable and feckless life of the polly.

I see the Liberal establishment are lining up behind the Downer lass with the usual "establishment endorsements". Me thinks this is not the time for understatement. Let them know that what is needed is a fresh and authentic voice, rare in Australian politics. You might look at appealing directly to the pre selectors claiming that the only people you will be beholden to is them not some "endorser". To accept the endorsement from a celebrity is an insult to the pre selectors who are presumed to be too dumb to make up their own minds. Andrew Robb was a great listener, (as was Howard and Reith.) The pre selectors will be used to openly voicing their views to their local member who was famous for listening to them. Most pollyies just talk, and usually drivel. Robb is one of the few exceptions to that rule. Might be wise to remember that and play to their expectations. Give them a good listening to, then give authentic voice to their concerns. Their deeply felt concerns will be little different from the rest of us so you can prepare your responses. If they are smart, and most active party members are, you should get up.

Anyway good luck

It is with much pleasure I must acknowledge that I was wrong. Although I didn't tell Tim this at the time, I thought that his appointment as a \$400k pa salaried Commissioner would transmogrify after about 6 months to the same situation as all the others. IE He would start believing he was actually worth \$400k pa for traipsing around the country lecturing us about our bad manners. (After all that is what all discrimination is about)

To my enormous pleasure I find that I was wrong and he is going to give it all up for a shot at Andrew Robbs seat.

Good for him and my apologies for doubting him

Cheers

Tim,

So sorry. I am FINALLY working through emails older than 13 Jul and I see I missed this one. I have responded noting you will have to leave a bit earlier to attend the Safe Schools pre-symposium dinner. I see these events are reasonably close to one another.

Apologies again. Will clean up emails TODAY!

Best,

Dear Tim

This month the Institute of Public Affairs will launch our nationwide tour to celebrate the release of the

IPA's new book, *Magna Carta: The Tax Revolt That Gave Us Liberty*, and we're delighted to be in Sydney on Wednesday 29 July.

Join the authors, IPA Executive Director John Roskam and Senior Fellow Chris Berg for a presentation and discussion about why this 800 year old document has played such a central role in securing our liberties:

Sydney Magna Carta public event

Wednesday 29 July

5.00pm for 5.30pm to 7.00pm

The Grace Hotel

77 York Street, Sydney

[Click here to book online](#) or call Sarah Wilson at the IPA on 03 9600 4744 or email her at xxxxxxx@xxx.xxx.xx

This event is free for IPA members and \$10 for non-members.

Magna Carta: The Tax Revolt That Gave Us Liberty, is now available to purchase. To order your hard copy for \$18.95, [click here](#). The book is also available on [Amazon Kindle](#).

Image removed by sender.

To learn more about why the Magna Carta is still relevant today, visit the IPA's [special new website](#), which explains its enduring importance.

I hope that you can join us for this important event.

Kind regards

Subject: Free expression stops terrorists

Follow Up Flag: Flag for follow up
Flag Status: Completed

'Letter: Free expression stops terrorists

Our defence forces deserve deep gratitude – not the foul insults that terrorist Man Haron Monis conveyed in his letters to them. But the High Court made a profound mistake when it split 3:3 on whether the implied constitutional right to freedom of political communication allowed Monis to offend others.

Harassment is the repeated use of expressions directed at an individual intending to intimidate them by causing fear or deep distress. Monis was properly convicted of that charge. Inciting violence, law breaking, or glorifying or inciting terrorism should be a criminal offence. But merely offending, insulting or humiliating another must be lawful, especially in political or religious discussion.

Freedom of expression is a core Australian value that builds social cohesion and allows those harbouring a sense of injustice to vent their anger peacefully. Without it, diverse societies must fracture and fail.

There is a remote chance that, had Monis secured, in part, the public victory for free expression that he sought, his fate, and that of his poor victims, may have been different...'

Note: No doubt I will be censored again. But this is a historic opportunity to inform the Australian public about precisely where the line on free expression should, and can be, drawn. *Criminal Code (Cth)* 471.12 is overbroad and partially unconstitutional.

Legal experts know well that the Monis case mirrors that of the Westboro case (*Snyder v Phelps* http://en.wikipedia.org/wiki/Snyder_v._Phelps) in the US where the First Amendment was found to protect offensive expressions directed at returning veterans and their families. The U.S. Courts have fashioned solutions so that those such as the Westboro Church can protest at public events, even celebrating the return of veterans or at their funerals, provided they do so at an appropriate distance in free speech zones but not outside - and within other legal boundaries.

It is standard constitutional law practice to 'sever' statutes i.e. to judge part of a statute to be unconstitutional, but preserve the rest. It was open to our High Court in *Monis v R* to have found that the statutory test of offensiveness is unconstitutional but the harassment and menacing elements of the statute are constitutional.

But since the *The Australian* newspaper has only ever offered tokenistic self-serving support for freedom of expression (largely designed to preserve Government censorship laws designed to protect multiculturalism and mass unselective immigration against pluralism and low level ('pro lo') genuinely selective immigration) the Australian public are repeatedly denied the opportunity to appreciate the full significance of Monis's High Court appeal, the similarity of Monis's case to the Bolt case, and the possible direction that law reform in Australia could take. **Sadly, the so called Freedom Commissioner has, to date, largely failed to remedy this. With respect, sadly, on past performance I expect little or nothing from him. Come on Mr Wilson, you are better than this!**

Of course Mr Bolt and Monis are in no way morally equivalent, but to the extent that Monis was convicted of merely offending someone he was dealt an injustice, as was Mr Andrew Bolt in his case when he offended so called 'white Aborigines'. To the extent that Monis was convicted on the charge of harassment he received his just deserts. But to suggest that Monis's case was frivolous or vexatious, or did not serve the public interest, is very wrong.

Andrew Bolt did an enormous public service by defending his legal case in the Federal Court, but a grave disservice by not appealing (s 47F). Unlike Monis, Mr Bolt should have tested the bounds of the constitutional implied freedom of political communication and other constitutional limits. The fact that Monis received legal aid so often denied to others is partly unjust, since others should also have access to justice.

Unless we secure meaningful law reform concerning freedom of expression then I predict that Islamism and sharia law will march even more quickly through our institutions and future generations will be effectively enslaved. As I once said - this is not about the 'nanny state' - this is a battle for the heart, and soul and future of a once great nation.

If, as I suspect, Monis's greater jihad was to extend the application of sharia law to Australia, then no mere victory for free expression would have sufficed. But how much longer can our Governments pretend that their so called hate speech laws are not simply, in part, sharia blasphemy law by other means? In practical terms they operate to empower ultra-orthodox Muslims and Islamists, entrench apostasy and blasphemy laws, disempower reformist Muslims and keep many Muslims trapped within the cage of the orthodox version of their religion. All so politicians can be guaranteed the 'ethnic vote'?

Prime Minister Abbott and his Attorney-General should be deeply ashamed. It is high time they redeemed themselves and became their better selves by honouring their freedom promise and defending the values they once said they held.

Of course my deepest sympathy goes to the poor victims and my gratitude goes to our police and defence forces.

Subject: FREEDOM OF SPEECH must be protected as a FUNDAMENTAL HUMAN RIGHTS by the AUSTRALIAN HUMAN RIGHTS COMMISSION

FREEDOM OF SPEECH MUST BE PROTECTED AS A FUNDAMENTAL HUMAN RIGHT BY THE AUSTRALIAN HUMAN RIGHTS COMMISSION

The appointment of the next President of the Australian Human Rights Commission will indicate the government's commitment to protecting one of the most fundamental rights of every truly functional democracy: the right to freedom of speech.

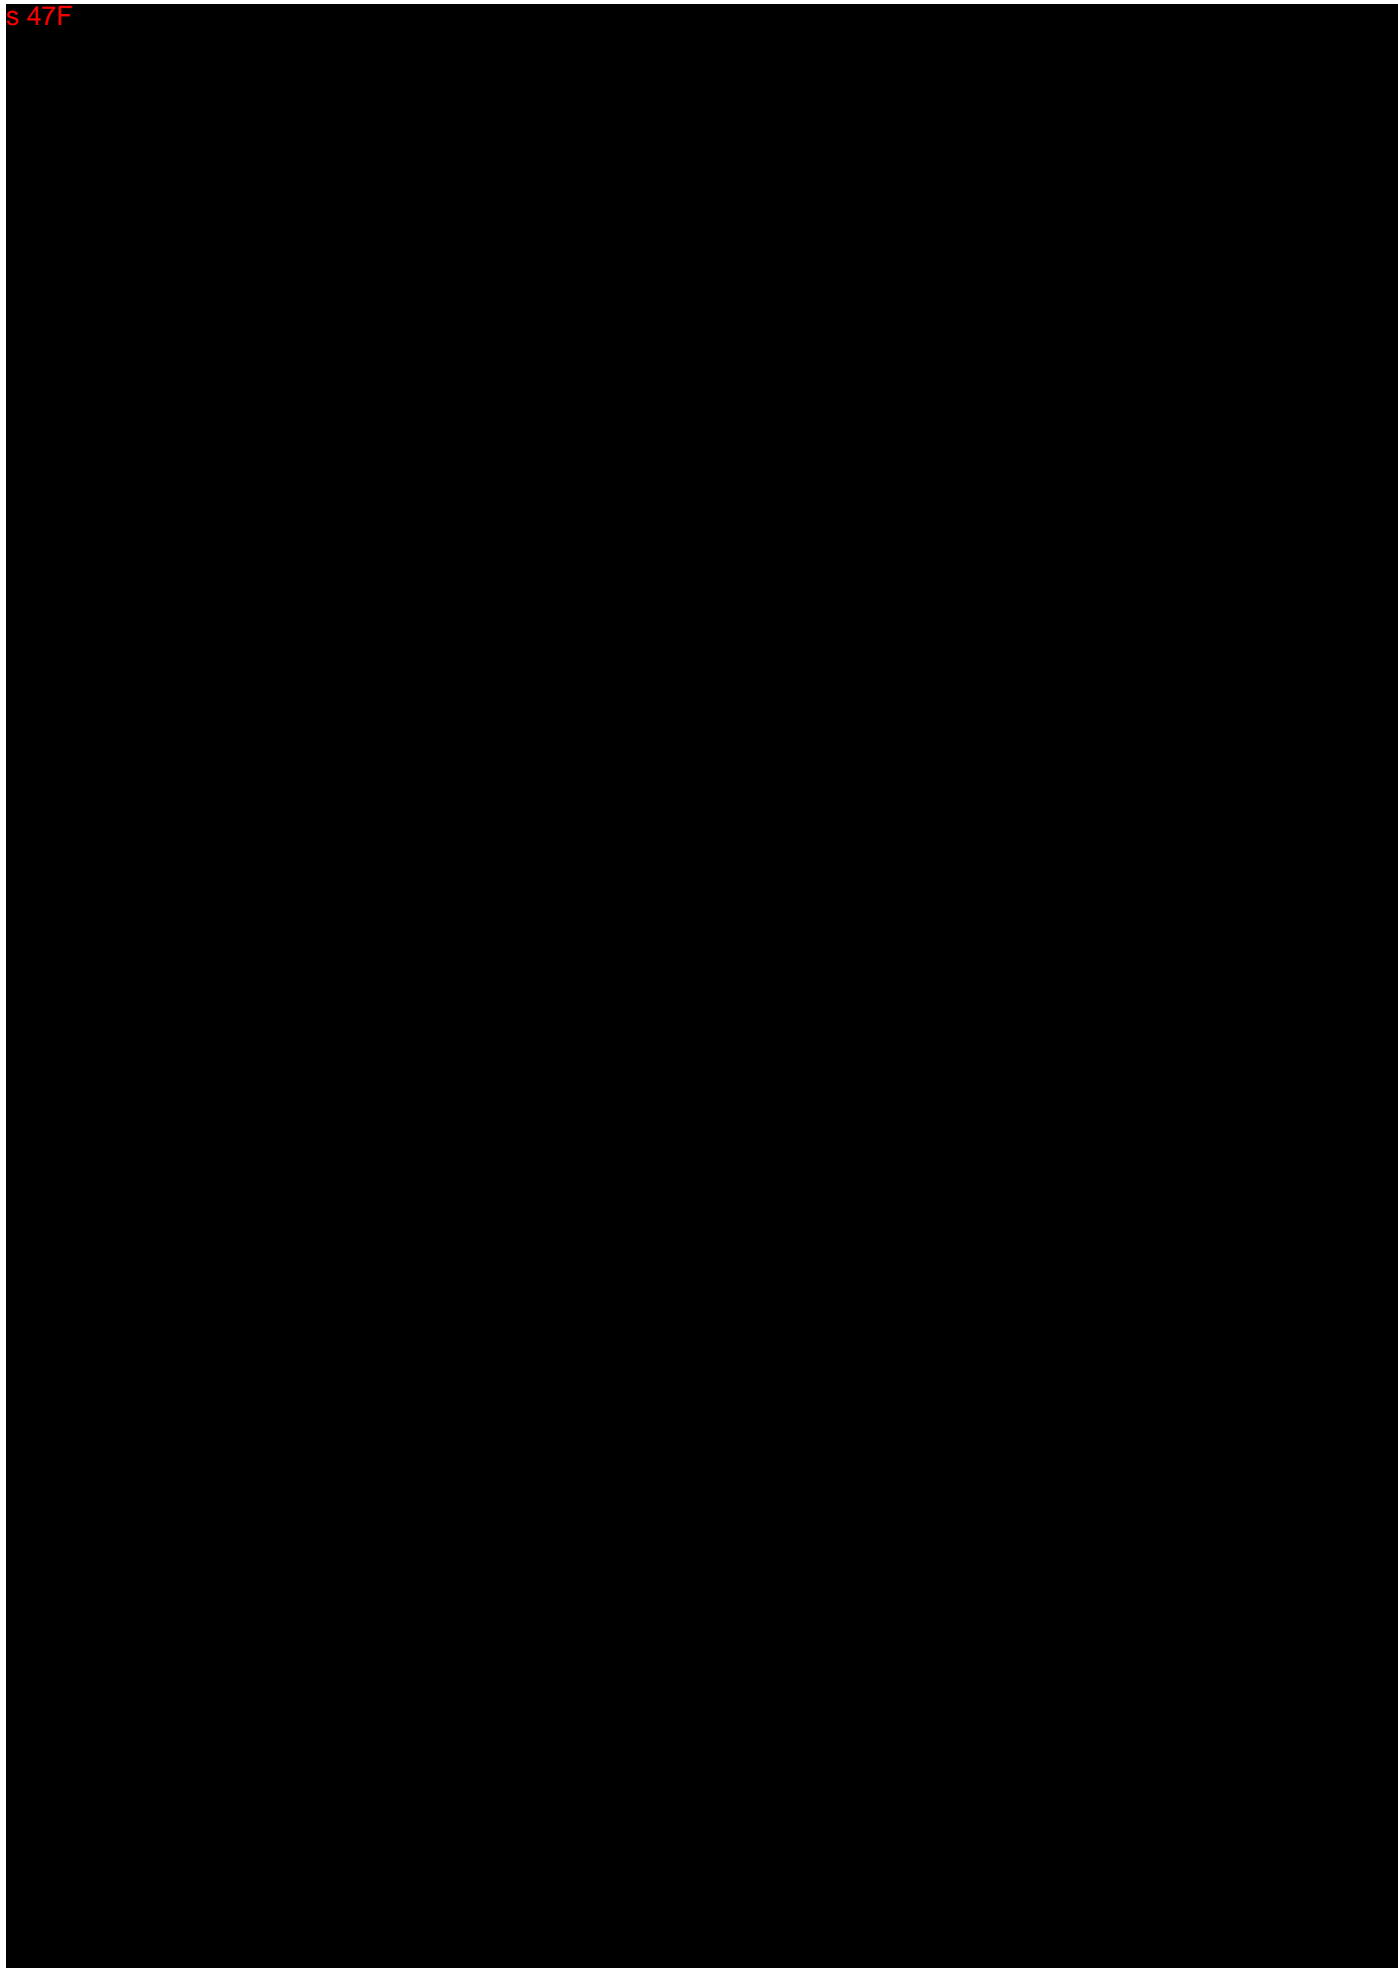

Regrettably, the freedom of speech has been under a serious attack in Australia over the years.

With this in mind, the government needs to appoint a President of the AHRC who is committed to protecting freedom of speech; someone with a solid track record of advocating for the right to freedom of speech.

This is a fundamental right of every Australian citizen, and it is a right that is constitutionally protected under the implied freedom of political communication as derived from the Australian Constitution.

Subject: 'Letter: Hear, see and speak no evil – blind, deaf and dumb? Tim Wilson

'Letter: Hear, see and speak no evil – blind, deaf and dumb?

Recently, twenty five leading Malaysian scholars risked their lives by writing to their Prime Minister expressing abhorrence of sharia law because it destroys fundamental freedoms. It imposes harsh penalties such as whipping, stoning, murder or imprisonment for apostasy, blasphemy, adultery, immodesty, homosexuality or consuming drugs or alcohol.

Muslim personal law authorises forced, underage, and plural marriages and marital rape and violence. It mandates unequal treatment and persecution of, and discrimination against, women non-Muslims and homosexuals. Muslim women are afforded half a man's share if they inherit. They cannot marry a non-Muslim and are subject to informal 'triple talac' no fault divorce at the man's behest after which they often lose all marital property and child custody.

But Tim Wilson, paid generously to protect our human rights and freedoms, refuses openly to condemn sharia law or even debate it. The Federal Attorney-General even inferred that sharia is largely compatible with Australian law! Wilson advocates retaining the word humiliate in s.18C of the *Racial Discrimination Act* and its ilk, allowing the continued implementation of sharia blasphemy law in Australia. Shocking..'

Notes: All this can be easily conformed by reading the primary sources of sharia law (Quran (Yusuf Ali) and Hadith (Sahih Bukhari)), the Sira (Muhammad's biography), an authoritative Tafsir (Ibn Kathir) and any authoritative text of Sharia fiqh (law) such as *Umdat al Salik* (Reliance of the Traveller), followed by human rights reports by expert agencies such as the UN, Human Rights Watch and the US State Department on nations that apply sharia in whole or part. Alas few Australians have the courage or willingness to do so, despite their numerous public statements about sharia law.

Again I expect censorship. Soon, like many others, I may simply give up and withdraw and another voice will have been silenced. I am sure *The Australian* newspaper would prefer all its critics to be silenced. Its self-serving, selective and tokenistic support of free expression masks its true intent. It is fundamentally elitist. It mistrusts the Australian people and wishes to retain so called hate speech laws so as to keep the majority silent and under its partial control. It does so in large part so as to enable the mass unselective immigration that makes its supporters and paymasters wealthy at the enormous expense of the nation and of social cohesion.

Personally, I am shocked that an openly gay man like Mr Wilson would remain silent as sharia law takes a firmer hold here in Australia. In fact his enthusiastic support of the so called freedom to enjoy publicly the extreme sharia law practice of niqab wearing necessarily makes the spread of sharia in Australia easier. It is disgraceful that such as Dr Albrechtsen, who presents herself as a 'freedom fighter', instead of supporting Senator Lambie (who almost alone in Parliament has expressed, even if clumsily or inexpertly, her opposition to sharia law) has openly insulted and mocked her. Who is the true narcissist I wonder?

Sharia law is profoundly dangerous for homosexuals – simply look to the work of genuine reformist Muslims (whom I have always strongly supported) such as Dr Irshad Manji and note the threats to her life. I personally abhor such persecution of, and negative discrimination against, homosexuals.

But extending so called hate speech laws to privilege Australian homosexuals at the expense of the fundamental rights and freedoms of others is profoundly divisive - as are gay marriage laws. Opposing both is not anti-gay or homophobic.

Personally, I am not someone who finds homosexuality disgusting or immoral but who tolerates it. I am not at all disgusted by it, nor do I find it offensive. In fact I positively support, welcome and enjoy most aspects of homosexual culture and see it as a positive contribution to diversity, as I do heterosexual culture. I suspect the vast majority of Australians, were they properly informed, agree with me and support gay union laws that provide substantive legal equality.

The informed majority oppose gay marriage laws because true equality allows each group to enjoy its own exclusive cultural institution. Changing radically the legal definition of traditional marriage effectively destroys it. It robs heterosexuals of their right to enjoy their own exclusive cultural institution. Doing so because homosexuals are now more politically powerful and can manipulate the media and machinery of Government better than the Christian Church or the majority of Australians is neither just nor fair. It is oppression of the majority by minorities. It is minocracy not democracy.

But, nonetheless, Marry Xmas to all.

This case is a small illustration of how under legal multiculturalism ('Many laws for many' not 'one law, Australian law, equally for all') sharia law will be applied to non-Muslims even against their wishes or best interests. This is Australia's future on its current trajectory.

Subject: Dr Arthur Laffer - Lessons from the Reagan Revolution | 18th March 2015, Melbourne

Follow Up Flag: Flag for follow up
Flag Status: Completed

Dear Tim,

On behalf of the Institute of Public Affairs and the Australian Chamber of Commerce and Industry, I'm delighted to invite you to a [special event with renowned economist Dr Arthur Laffer](#) on the topic *Lessons from the Reagan Revolution: The case for lower taxes*. Dr Arthur Laffer was economic policy advisor to President Ronald Reagan and inventor of the Laffer Curve.

Dr Arthur Laffer was a crucial figure behind Reaganomics in the 1980s. A member of Reagan's Economic Policy Advisory Board, he pushed for a reduction in taxes in order to spur economic growth. This would lead to a world-wide tax cutting movement.

A 1999 *Time Magazine* cover story, 'The Century's Greatest Minds', deemed the Laffer Curve one of 'a few advances that powered this extraordinary century.' Laffer's curve would change the American economy forever, leading to an economic revolution and ultimately more human flourishing.

Dr Arthur Laffer also advised Prime Minister Margaret Thatcher on fiscal policy in the U.K. during the 1980s. He is the author of countless books, including *The End of Prosperity: How Higher Taxes Will Doom the Economy - If We Let it Happen*. You can watch [this excellent video](#) featuring Dr Laffer, along with Donald Rumsfeld and Dick Cheney, on the impact of the Laffer Curve on US economic policy. Or you can read Dr Laffer's telling predictions on the negative consequences of US stimulus spending in the *Wall Street Journal* [here](#).

The full details of *Lessons from the Reagan Revolution: The case for lower taxes* are:

Drinks and Lecture
Wednesday, 18th March 2015
5.00pm for 5.30pm until 7.00pm
InterContinental Melbourne, The Rialto
495 Collins Street, Melbourne

The event is \$15 for IPA members, \$30 for non-members and free for IPA Young members. Drinks will be provided.

To purchase your tickets please [click here](#), or call s 47F at the IPA on s 47F

I hope you can join us to hear from this important figure in US history who helped change our world for the better.

Kind regards

s 47F

Dear Tim,

Please read, review and consider the email below s 47F
s 47F, in regards to this fundamental human rights and civil liberties health issue for all Australians.

The current petition on Change.org echoes these sentiments in what is becoming the 'silenced minority'; <https://www.change.org/p/minister-scott-morrison-don-t->

[punish-parents-for-making-an-informed-choice-about-their-children-s-health-all-parents-deserve-to-make-an-uncoerced-choice](#)

If governments are going to coerce or mandate parents to inject their children with a plethora of vaccines - many of which contain proven neurotoxins like aluminium - then the onus of proof for both safety and efficacy lies with them.

If governments, doctors and vaccine makers are unwilling to take legal responsibility for any harm caused to recipients as a result of being injected with vaccines, then responsible parents should not be willing to expose their children to the potential risks (which recent scientific evidence has proven are many and varied). As long as they hide behind a shield of legal protection, the fallacious dogma that "vaccines are safe and effective" is both hollow and meaningless.

There are some 40,000 Australians who will be directly affected by the proposed change in government policy (ie. No Jab, No Pay) for both family payments and child care benefits that all Australian families are entitled to. The most affected by these proposed loss of payments will be those who can least afford them - low income families. This is an outrageous travesty of justice based on a widely accepted fallacy (ie. the unvaccinated spread disease so are a threat to society) when in fact the opposite is the case (see links below referring to live-virus vaccine shedding and vaccinated asymptomatic carriers). However, regrettably, the campaign of fear and ignorance seems to be working.

The proposed legislation by government will punish parents, with unconstitutional penalties, for making an informed choice about their children's health. Such coercive vaccination policy is both fallacious and fundamentally unjust (as outlined in my email below). The new laws effectively remove the fundamental human right of 'informed medical consent' - or at least discriminates against those families who decide to enact this basic human right. Laws that the High Court of Australia should justifiably reverse and set an ethical precedent against before such laws become even more draconian (for example, only fully vaccinated children will be permitted to attend pre-schools or even state schools....??)

This is especially the case when these flawed laws are based on the complete fallacy that the unvaccinated are "carriers of disease" (see the links and evidence below exposing this common - yet antiquated - fallacy). Vaccines fail simply because viruses and bacteria are constantly mutating and evolving. Just as the overuse of antibiotics has created antibiotic-resistant superbugs, the overuse and ever-increasing vaccination schedule is creating vaccine resistant viruses (more details below to evidence-based studies confirming this). And crucially for general health, both antibiotics and vaccines destroy gut flora which is so essential for a strong natural immune system (recent studies have shown that some 70% of all immune cells are formed in the gastro-intestinal tract).

Dr. Lucija Tomljenovic, Ph.D., uncovered more than 30 years of hidden government documents exposing vaccine schedules as a complete hoax, not to mention the fraud of the vaccines themselves to provide any real protection against disease. She obtained these documents via the Freedom of Information Act in the U.K (see more details below). A similar request via Australia's FOI Act to our government health authorities (eg. Department of Health, TGA) should also reveal the same motivations for protecting the current vaccination agenda.

At one end of the spectrum low-income families are being financially coerced into fully vaccinating their children against their wishes and better judgement (the Australian vaccination schedule currently mandates more than 30 vaccine doses in the first 18 months of life alone, with many of these vaccines including aluminium - a known neurotoxin) meanwhile financial incentives and bonuses paid to doctors by Australian health authorities for administering vaccinations will now be boosted for every 'catch-up vaccine' administered to babies/infants and children according to these new laws. Such laws are not only unethical and immoral they are totally unjust and indefensible.

Please review the information below and give it due consideration in the hope that this ill-conceived, short-sighted and emotive-driven government policy can be blocked or reversed, in the High Court of Australia if necessary, before it causes irreparable harm to our most basic human rights and also to the long-term health of our children.

If I can assist in any way with providing further evidence-based support to this argument, which are both credible and copious, please feel free to contact me anytime. This cause could prove to be the most worthwhile and meaningful you have undertaken in your career.

Thanking you for your time and consideration and looking forward to your prompt reply in regards to your recommendations or advice on this vital and timely issue.

Sincerely,

s 47F

Ps. In regards to the supposed safety and efficacy of vaccines, here's the latest news about the HPV vaccine Gardasil;

Merck's Former Doctor Predicts that Gardasil will Become the Greatest Medical Scandal of All Time

.. I predict that Gardasil will become the greatest medical scandal of all times because at some point in time, the evidence will add up to prove that this vaccine, technical and scientific feat that it may be, has absolutely no effect on cervical cancer and that all the very many adverse effects which destroy lives and even kill, serve no other purpose than to generate profit for the manufacturers.

There is far too much financial interest for these medicines to be withdrawn..

Learn more at: <http://healthimpactnews.com/2014/medical-of-all-time/#sthash.QW6pGqew.FPmsWDJ8.dpuf>

The Australian developed HPV vaccine Gardasil not only does not work, it is killing and maiming young girls around the world. A former Merck doctor blows the whistle, pointing out the fraud and scam of it all. Yet another case of Big Pharma profits ahead of lives. And Gardasil is on the vaccination schedule for all 12-13 year old girls - as well as all boys! – here in Australia. What a despicable disgrace!

s 47F

Dear

s 47F

The recent media and political rumblings about targeting parents who make an informed consent decision as to what vaccines will be injected into their children's blood streams is more than an attack on health freedoms. It's an attack on our basic civil and legal liberties and our most fundamental of human rights. This is especially concerning considering the mounting scientific evidence - particularly from independent medical sources not funded by pharmaceutical companies who have an obvious conflict of interest - that questions both the safety and efficacy of our ever-increasing vaccination schedule.

Please read these letters which were sent to s 47F in regard to recent discussion about child care and family benefits being linked to mandatory vaccinating;

s 47F

Why are parents of fully vaccinated children so fearful of unvaccinated children? And don't they realise that fully vaccinated children can still carry the very virus or bacteria that they were supposedly vaccinated against on their skin, in their nasal cavity, breath and cough (whether they have developed immunity or not)?

In fact, live viruses can be spread by the recipient of a vaccine via shedding and even dead virus vaccines can make the vaccine recipient an asymptomatic carrier of the virus thereby unwittingly pass the virus on to those around them. So where's the rationale in the fearful campaign against the unvaccinated? Don't we all have the right, both as individuals and as parents, to decide what substances are injected in to our bodies and those of our children? When this most basic of human right is under attack then our fundamental freedoms become the victim.

200 Evidence-Based Reasons NOT To Vaccinate - FREE Research PDF Download!

The media, your pediatrician, politicians and health authorities like the CDC and FDA claim that vaccines are safe and effective. So why do hundreds of peer-reviewed studies indicate the opposite is true? Read, download, and share this document widely to provide the necessary evidence-based counterbalance to the pro-vaccination propaganda that has globally infected popular consciousness and discussion like an intractable disease.

<http://www.greenmedinfo.com/blog/200-evidence-based-reasons-not-vaccinate-free-research-pdf-download>

It's no coincidence that the prevalence of childhood asthma, eczema, allergies, autism, ADHD and other neurodevelopment and autoimmune disorders have escalated right alongside the increased vaccine schedule over recent decades. Not

surprising when vaccines contain heavy metals like mercury and aluminium - known neurotoxins.

Childhood diseases like mumps, measles, chicken pox and flu - which seldom cause serious harm unless the child is over-medicated - act to prime and strengthen the child's natural immune system for life (unlike short-lived vaccine acquired immunity).

Mounting evidence questions both the safety and efficacy of the ever-growing vaccine schedule. The only way to settle this vital health issue is to perform a thorough study comparing the health outcomes of vaccinated against unvaccinated populations. But no government or medical body is willing to do so. Perhaps that's because such previous studies show that unvaccinated children are far healthier than the vaccinated ones;

<http://www.vaxchoicevt.com/science/studies-comparing-vaccinated-to-unvaccinated-populations/>

Studies Prove Without Doubt That Unvaccinated Children Are Far Healthier Than Their Vaccinated Peers

By Christina England

A study from the 1990s has come to light, proving that compared to unvaccinated children, vaccinated children were more likely to suffer from asthma, eczema, ear infections, hyperactivity and many other chronic conditions.

Furthermore, the study identified that there was a ten-fold increase in the incidence of tonsillitis in the children who were vaccinated, and a total lack tonsillectomy operations among the children who were unvaccinated.

Read more here; <http://healthimpactnews.com/2014/studies-outside-the-u-s-show-unvaccinated-children-healthier-than-vaccinated-children/>

Please see the vital information below which documents the decades of fraud and corruption by big pharma and public health authorities about the purported safety and efficacy of vaccines.

Such an essential topic is of major importance to every Australian and is especially topical given the campaign of fear and misinformation shown by our media, medical and pharmaceutical industry and government health authorities.

Thank you for your consideration of this significant health concern which affects all Australians – especially our children – and its implications for our basic health freedoms and human rights.

Best regards,

s 47F

An investigative report compiled by Dr. Lucija Tomljenovic, Ph.D., uncovers more than 30 years of hidden government documents exposing vaccine schedules as a complete hoax, not to mention the fraud of the vaccines themselves to provide any real protection against disease.

The JCVI (Joint Committee on Vaccination and Immunization) made continuous efforts to withhold critical data on severe adverse reactions and contraindications to vaccinations to both parents and health practitioners in order to reach overall vaccination rates which they deemed were necessary for 'herd immunity,' a concept which does not rest on solid scientific evidence," explains Dr. Tomljenovic in the introduction to her paper.

The information Dr. Tomljenovic gathered speaks for itself. Not only did the JCVI routinely ignore questions of safety as they came up with regards to the ever-expanding vaccination schedule, but the group actively censored unfavorable data that shed a "negative" light on vaccines in order to maintain the illusion that vaccines are safe and effective. Beyond this, the JCVI regularly lied to both the public and government authorities about vaccine safety in order to ensure that people continued to vaccinate their kids.

The JCVI's official policy was to cherry-pick unreliable studies to support its own opinions on vaccines rather than rely on independent, scientifically-sound studies to make vaccine policy recommendations.

The eye-opening, 45-page paper goes on to explain how vaccine schedules were established through the calculated downplaying of vaccine safety concerns and the over-inflating of vaccine benefits; the promotion of dangerous new vaccines into the pediatric schedule through deception; the discouraging of vaccine safety follow-up studies; and the widespread brainwashing of the public through manipulation and scientific sleight-of-hand tricks.

Deliberately concealing information from parents for the sole purpose of getting them to comply with an "official" vaccination schedule should be considered as a form of ethical violation or misconduct.

Official documents obtained from the UK Department of Health (DH) and the Joint Committee on Vaccination and Immunisation (JCVI) reveal that the British health authorities have been engaging in such practice for the last 30 years, apparently for the sole purpose of protecting the national vaccination program.

This extraordinary paper was published by a courageous doctor and investigative medical researcher who dug the dirt on 30 years of secret official transcripts of meetings of UK government vaccine committees and the supposedly independent medical "experts" sitting on them with their drug industry connections.

If you want to get an idea of who is responsible for your child's condition resulting from a vaccine adverse reaction then this is the paper to read. What you have to ask yourself is if the people on these committees are

honest and honourable and acting in the best interests of British children, how is it this has been going on for at least 30 years?

This is what everyone has always known but could never prove before now. Pass this information on to others so they can see what goes on in Government health committees behind locked doors;

<https://childhealthsafety.wordpress.com/2012/03/14/government-experts-cover-up-vaccine-hazards/>

Through several Freedom of Information Act requests, Dr. Tomljenovic was able to obtain transcripts of private meetings that were held between the Joint Committee on Vaccination and Immunization (JCVI), a so-called "independent expert advisory committee" that makes recommendations to the government about vaccine policy, and various British health ministers over the years. And after poring through this plethora of information, which had previously been veiled from public view, Dr. Tomljenovic made these disturbing discoveries.

Read the complete eye-opening paper here for the full evidence to back up her conclusions;

<http://nsnbc.me/wp-content/uploads/2013/05/BSEM-2011.pdf>

Vaccine Fraud & Corruption Exposed

There is a growing body of evidence questioning both the efficacy and safety of vaccines. Powerful influence from pharmaceutical lobbyists, whose primary goal is profit, and other vested interests have appointed their own people within medical safety and regulatory bodies. A clear case of conflict of interest which is being exposed.

A dedicated doctor has researched this vital health issue and found many documents which support the fact that vaccines are dangerous, not tested properly and have doubtful value and actually cause many injuries.

This brave doctor has also uncovered endemic corruption in the field and shameful conflicts of interest which have been aided and abetted by government. A recent investigative report compiled by Dr. Lucija Tomljenovic, Ph.D., uncovers more than 30 years of hidden government documents exposing these vaccine schedules as a complete hoax, not to mention the fraud of the vaccines themselves to provide any real protection against disease.

The JCVI (Joint Committee on Vaccination and Immunization) made continuous efforts to withhold critical data on severe adverse reactions and contraindications to vaccinations to both parents and health practitioners in order to reach overall vaccination rates which they deemed were necessary for 'herd immunity,' a concept which does not rest on solid scientific evidence," explains Dr. Tomljenovic in the introduction to her paper.

The information Dr. Tomljenovic gathered speaks for itself. Not only did the JCVI routinely ignore questions of safety as they came up with regards to the ever-expanding vaccination schedule, but the group actively censored unfavorable data that shed a "negative" light on vaccines in order to maintain the illusion that vaccines are safe and effective. Beyond this, the JCVI regularly lied to both the public and government authorities about vaccine safety in order to ensure that people continued to vaccinate their kids.

Interestingly as far as the MMR vaccine is concerned, this critical piece of information not only reinforces the legitimacy of Dr. Wakefield's findings on a link with autism, which were illegitimately declared to be fraudulent by the establishment, but also illustrates just how painfully long this scam has been taking place.

The JCVI's official policy was to cherry-pick unreliable studies to support its own opinions on vaccines rather than rely on independent, scientifically-sound studies to make vaccine policy recommendations.

The eye-opening, 45-page paper goes on to explain how vaccine schedules were established through the calculated downplaying of vaccine safety concerns and the over-inflating of vaccine benefits; the promotion of dangerous new vaccines into the pediatric schedule through deception; the discouraging of vaccine safety follow-up studies; and the widespread brainwashing of the public through manipulation and scientific sleight-of-hand tricks.

This is a vital health issue that warrants further investigation and public awareness. Parents especially need to be made aware of this as their children are ultimately the victims from the withheld dangers of vaccination and the endemic campaign of deceit by public health authorities.

Massive Fraud In Merck MMR Vaccine Testing

Posted by Sheller, P.C.
October 10, 2014

Merck's Measles-Mumps-Rubella (MMR) vaccine is under fire following allegations of wrongdoing from several parties, namely two former Merck scientists-turned-whistleblowers. A third whistleblower is a senior scientist at the Centers for Disease Control (CDC), who has confessed to misconduct involving the same MMR vaccine.

A U.S. judge rejected Merck's attempt at a dismissal after determining there was plausible grounds for the claims. Therefore the medical giant is being forced to defend themselves and their vaccine in at least two federal cases. Merck could also be forced to defend itself in Congress. Representative Bill Posey (R-FL) – a known critic of the CDC whom is investigating the link between autism and vaccines – is reviewing hundreds of documents turned over by the CDC whistleblower.

According to the whistleblowers' court documents, Merck's misconduct was far-ranging: It "failed to disclose that its mumps vaccine was not as effective as Merck represented, (ii) used improper testing techniques, (iii) manipulated testing methodology, (iv) abandoned undesirable test results, (v) falsified test data, (vi) failed to adequately investigate and report the diminished efficacy of its mumps

vaccine, (vii) falsely verified that each manufacturing lot of mumps vaccine would be as effective as identified in the labeling, (viii) falsely certified the accuracy of applications filed with the FDA, (ix) falsely certified compliance with the terms of the CDC purchase contract, (x) engaged in the fraud and concealment describe herein for the purpose of illegally monopolizing the U.S. market for mumps vaccine, (xi) mislabeled, misbranded, and falsely certified its mumps vaccine, and (xii) engaged in the other acts described herein to conceal the diminished efficacy of the vaccine the government was purchasing."

Read more here; <http://philadelphia.legalexaminer.com/fda-prescription-drugs/massive-fraud-in-merck-mmr-vaccine-testing/>

..According to David Lewis, PhD, former senior-level microbiologist with the U.S. EPA's Office of Research & Development, skewing scientific data to support government policies is a major problem at federal agencies, including EPA, CDC, and USDA. Lewis, who was terminated by EPA for publishing papers in Nature that questioned the science the agency uses to support certain regulations, believes top-down pressure on federal scientists and researchers working on government-funded projects in academia is jeopardizing public health.

"Working for the government is no different than working for corporations. You either toe the line or find yourself looking for another way to make a living," Lewis says. "No one would be surprised if Merck published unreliable data supporting the safety of its products. Why would anyone be surprised that the CDC is publishing skewed data to conclude that the vaccines it recommends are safe? We need a better system, where scientists are free to be honest."

<http://www.prohealth.com/library/showarticle.cfm?libid=19191>

What we need is independent scientific research, not more of the fraudulent science bought and paid for by the very parties who profit from the findings or health regulators obsessed with maintaining their misguided belief in an archaic notion of a 'greater good' at any cost.

Confidential Document from GSK to the Authorities

.. according to an article in the November 2011 issue of the well-known and official publication *Revue française du Practicien* (a French magazine for the medical profession), only 1 to 10% of serious vaccine adverse effects are actually reported and logged (2). The extent of the problem is therefore grossly under-estimated. The document also mentions no fewer than 37 other deaths of children recorded since the vaccine was launched in 2000, amounting to a minimum total of 73 infant deaths..

<https://childhealthsafety.files.wordpress.com/2012/12/initiative-citoyenne-press-release-infanrix-hexa-6-12-121.pdf>

British Health System covers up vaccine dangers

If you live in America the official U.S. *Centers for Disease Control and Prevention* (CDC) "Immunization Schedules," now recommends a staggering 29 vaccines be given between birth and 6 years of age, including yearly flu shots, as well as another 5 to 16 vaccines between ages 7 and 18 (<http://www.cdc.gov/vaccines/schedules/>).

Now an investigative report compiled by Dr. Lucija Tomljenovic, Ph.D. focussing on the British Health System's elaborate cover-up about its own national vaccination

programme shows more than 30 years of hidden government documents suggesting these vaccine schedules as a complete hoax, not to mention the fraud of the vaccines themselves to provide any real protection against disease.

Her paper suggests that vaccination schedules are designed more for the purpose of serving corporate interests than public health. Government authorities, it turns out, in an ongoing bid to satisfy the private goals of the vaccine industry, have deliberately covered up pertinent information about the dangers and ineffectiveness of vaccines keeping it from parents in order to maintain a high rate of vaccination compliance. And in the process, they have put countless millions of children at risk of serious side effects and even death.

You can access Dr. Tomljenovic's full paper here: <http://www.ecomed.org.uk/wp-content/uploads/2011/09/3-tomljenovic.pdf>

An ongoing study out of Germany comparing disease rates among vaccinated and unvaccinated children points to a pretty clear disparity between the two groups as far as illness rates are concerned. As reported by the group *Health Freedom Alliance*, children who have been vaccinated according to official government schedules are up to five times more likely to contract a preventable disease than children who developed their own immune systems naturally without vaccines.

Released as its own preliminary study back in September 2011, the survey includes data on 8,000 unvaccinated children whose overall disease rates were compared to disease rates among the general population, the vast majority of which has been vaccinated. And in every single disease category, unvaccinated children fared far better than vaccinated children in terms of both disease prevalence and severity. In other words, the evidence suggests that vaccines are neither effective nor safe.

"No study of health outcomes of vaccinated people versus unvaccinated has ever been conducted in the U.S. by CDC or any other agency in the 50 years or more of an accelerating schedule of vaccinations (now over 50 doses of 14 vaccines given before kindergarten, 26 doses in the first year)," wrote Louis Rain back in 2011 for Health Freedom Alliance about the survey.

HPV vaccine linked to deaths

A 2012 study published in the journal *Pharmaceutical Regulatory Affairs* concludes that viral components contained in the human papillomavirus (HPV) vaccine Gardasil can cross the blood-brain barrier and trigger cerebral vasculitis, a severe form of blood vessel inflammation in the brain that can lead to severe autoimmune disorders and even death.

Attacking Ourselves: Top Doctors Reveal Vaccines Turn Our Immune System Against Us

The research is hard to ignore, vaccines can trigger autoimmunity with a laundry list of diseases to follow. With harmful and toxic metals as some vaccine ingredients, who is susceptible and which individuals are more at risk?

<http://www.greenmedinfo.com/blog/attacking-ourselves-top-doctors-reveal-vaccines-turn-our-immune-system-against-us>

Mercury-laden flu shots are only about 1 percent effective

The implication here is that flu shots may still provide some protection for some people. But as we reported back in 2011, flu shots are only about 1.5 percent effective, at best. The vast majority of people who get flu shots are not only not protected against the flu, but many of them end up contracting the virus while their unvaccinated peers remain healthy.

Then, there's the issue of toxic mercury in vaccines, which tests conducted by the Natural News Forensic Food Lab revealed is present in very high amounts in flu shots. Tests conducted on GlaxoSmithKline (GSK)'s *Flulaval* vaccine revealed 51 parts per million (ppm) of mercury, which is over 25,000 times higher than the maximum contaminant level for water established by the Environmental Protection Agency (EPA).

<http://www.globalresearch.ca/new-york-city-mandates-flu-shots-for-toddlers-even-after-centers-for-disease-control-cdc-admits-they-dont-work/5423201>

Vaccination: The Neurological Poison So Common Your Doctor Probably Pushes It

- If you follow the recommended vaccine schedule in the United States, your child will be exposed to high amounts of intrinsically toxic aluminum adjuvants through routine vaccinations; researchers suggest aluminum adjuvants in vaccines may significantly contribute to autoimmunity in pediatric populations
- Adjuvants can cause your immune system to overreact to the introduction of the organism you're being vaccinated against, leading to a break down in self-tolerance, i.e. your immune system attacks your own body as "other"
- Vaccine-induced immune challenges can lead to permanent alterations in brain and immune function, including serious, chronic inflammatory conditions
- Children are particularly vulnerable to toxic insults; a new report states that a "rigorous evaluation of the vaccine-related adverse health impacts in the pediatric population is urgently needed"

<http://articles.mercola.com/sites/articles/archive/2012/04/11/vaccination-impact-on-childrens-health.aspx>

US Centers for Disease Control Issues Flu Vaccine Apology: This Year's Vaccine Doesn't Work!

If you take flu shots, you are being poisoned by quacks

The upshot of all this is that flu shots utterly lack any scientific evidence of safety or efficacy. We don't know if they work at all, in other words, and neither does the vaccine manufacturer. Neither do the doctors or medical staff who administer them. Flu vaccines are injected into people purely as a matter of blind faith in the very same companies that have already been convicted of felony crimes.

GlaxoSmithKline, for example, not only manufactures this Flulaval vaccine... the company also committed multiple felony crimes and got caught bribing doctors, ultimately agreeing to pay a multi-billion-dollar criminal settlement with the U.S. Department of Justice.

Trusting a flu shot made by a corporation of felons is a lot like trusting the purity of heroin you buy from a street dealer. Both flu shots and street heroin have at least one thing in common, by the way: neither has ever been tested for safety.

We also know that flu shots contain neurotoxic chemicals and heavy metals in alarming concentrations. This is irrefutable scientific fact. We also know that there is no "safe" form of mercury just like there is no safe form of heroin — all forms of mercury are highly toxic when injected into the body (ethyl, methyl, organic, inorganic).

Share this story, spread the truth

Share this story with everyone who needs to know the truth about flu vaccines. This message needs to get out. Every fact stated in this article is 100% true and verified. The quotes from the Flulaval package insert are on-the-record statements from GlaxoSmithKline...

The Truth About the Drug Companies: How They Deceive Us and What to Do About It

In this book, her most recent, Marcia Angell explores pharmaceutical research, deplores the rapidly expanding involvement (and distortion of truth) of Big Pharma, and implores us all (physicians, patients, politicians) to do something about it.

The dust-jacket blurb asserts that Angell, "during her two decades at *The New England Journal of Medicine* had a front-row seat on the growing corruption of the pharmaceutical industry."

Since leaving the *Journal*, she's gone behind the curtains of Big Pharma, Big University, and Big Faculty. Drawing on her own work and on her thoughtful analysis of research, company financial statements, and investigative reports into drug development and marketing, Angell writes with the unambiguous and unyielding style that *Journal* readers came to expect and trust.

"The combined profits for the ten drug companies in the Fortune 500 (\$35.9 billion) were more than the profits for all the other 490 businesses put together (\$33.7 billion) [in 2002]. Over the past two decades the pharmaceutical industry has moved very far from its original high purpose of discovering and producing useful new drugs. Now primarily a marketing machine to sell drugs of dubious benefit, this industry uses its wealth and power to co-opt every institution that might stand in its way, including the US Congress, the FDA, academic medical centers, and the medical profession itself."

-- [Dr. Marcia Angell](#), former editor in chief of the *New England Journal of Medicine*

The book review below, taken from the prestigious *New England Journal of Medicine*, clearly reveals just how corrupt the pharmaceutical and health care industries have become. The book's author, Marcia Angell, M.D., is a former [editor in chief](#) of the highly respected *Journal*. She is currently a senior lecturer in social medicine at Harvard Medical School. Her book, *The Truth About the Drug Companies*, provides yet another eye-opening example of how greed has taken over many facets of business and government, and offers empowering ideas on what we can do about it.

New England Journal of Medicine

My plan would be to discuss what freedom of speech means, how far it can extend on the internet, legal implications of what is said (or done), what the government can/should do to ensure people are able to express themselves freely while still protecting people who would require it. I would send a run-down of discussion points beforehand. As you can see from the s 47F I have done, these are very loose and intended to be educational about the issue.

Would you be interested in doing this?

Hi Tim, **s 47F** here again. I am hoping you are still available for the interview.

I can meet you in a location that suits.

Are you still in Melbourne? I will be in Melbourne 3–6th in Feb. Any morning is good, and all day Tuesday.

I thought you may have moved to Sydney for your new role. In that case, any time before the 24th January, 10th Feb, or 14th Feb (I'm in and out of town that month and back in March).

Hopefully we can work something out.

Best wishes,

s 47F

Subject: Invitation to participate in research on the politics of climate change and energy in Australia

Dear Tim,

My name is s 47F. I'd like to interview you as part of a s 47F. I hope to learn about the influence of public intellectuals and civil society in debates over government policy for emission management and proposed reforms of energy and resource markets.

s 47F because of your contribution to the public debate over climate and energy industry issues in Australia.

If you decide to participate, I will meet with you at your workplace, or another location that suits (e.g. coffee shop) to conduct a 30-60 minute interview. Please let me know the best time for a meeting.

I'm in Melbourne this week 14-16th, and 25-30th November.

About the interview

Human Rights and Same Sex Marriage - being resent with corrections

s 47F

s 47F

s 47F

In relation to this I should like to draw your attention to the views of Australia's Human Rights Commissioner, Tim Wilson – which seemed to be that some legal protections would be needed for those with conscientious objections in the event that same sex marriage is approved (see s 47F

Though Mr Wilson is apparently in favour of legalizing same-sex marriage, it might be useful to seek support from the Australian Human Rights Commission in relation to protecting the positions of those who conscientiously object on religious or other grounds. And, as the latter email to Mr Wilson noted, the question of what children are taught in schools would also presumably be a matter requiring protection for teachers if same sex marriage were approved – eg because [significant numbers](#) of children (eg 15%-25%) are apparently subject to sexual abuse and that abuse seems to [affect victims' perceptions of their sexuality](#) in some cases. If teachers were allowed / required to teach children that (say) 'being gay is always OK', this would abuse the rights (ie to reliable information about the [complexities of 'homosexuality'](#)) of children whose perceptions of their same-sex attraction were the result of sexual abuse.

Hypocrisygate?

Labour leader Shorten reportedly ('Keep it nice, Shorten tell critics of change' 31/3/14) warns supporters of Government censorship not to overreach by calling opponents bigots or using incendiary language but then labels proposals to limit censorship as dangerous and incendiary. Hypocritical dog-whistling?

Cases suggest otherwise. In *Shron* a Jew complained about a Nazi swastika depicted on a historical picture of a war plane on a Telstra phone card; in *Miller* a Jew complained about the Jewish head of a Jewish organisation for saying offensive things about Jews; in *Kelly-Country* and *Hagan* Indigenous people were consulted and found a comedian portraying an Aborigine and sign on the Nigger Brown Stadium funny or inoffensive (but some did so it was take down); in *De la Mare*, *Bryant*, *Korczak* and *D'Olivera* whites complained about the SBS comedy *Darkest Austria* (SBS argued special privileges exempted it from hate speech laws!) being called Pom or a Polish 'grass eater' or a Democrats poster using the racial identity of babies to attract votes; in *McLeod* a white male prisoner officer objected to being called a white c..t by a disadvantaged Indigenous woman. Hardly dangerous.

Has the world gone mad? Protestors inciting violence and law breaking with signs calling for the beheading of blasphemers or the murder or rape of our Prime Minister (clearly illegal) apparently suffer no punishment. The Government gags journalists for life and threatens them with jail and the media supports it and oppose change.

Subject: Fwd: Exporting control to the UN - an urgent wake up call!
Attachments: RightQuestion Human Rights.pdf; ATT00001.htm

It is clear from all that we now know and have discovered of late, that past and present politicians are not and never have been working in our interest, the interests of the Sovereign People of Australia. Rather, they have all along been working, in unison for a Foreign Entity, namely the unelected Socialist United Nations. All to our detriment and that of future generations.

This must end, it is up to us the Sovereign People of this Nation to make a stand and to do it now! This is an urgent wake up call!

As we know the unelected UN Sustainable Development Agenda 21 aka Creeping Communism, has been in Australia since 1992 and still no Government has told us about it. We have to make them come clean.

s 47F

This letter is a must read, and for those on the bcc list please pass onto your contacts to further distribute.

Subject: Exporting control to the UN - an urgent wake up call!
Date: 14 March 2015 1:53:08 pm AEDT

Hi all,

You see below, confirmed again, control of Australia's environmental policies, including climate change, AG21, and sustainability, is increasingly being exported to foreign countries, especially through the UN. Since this is all part of globalisation however, control of other policies, even including our human rights, is also being exported to the UN.

This exporting of control typically occurs gradually and involves various stages. Firstly, our government, on our behalf, signs various international treaties or agreements, which the instigators always rush to say are 'soft law' and 'non-

binding'. In reality however, although having no basis in law (and no justification democratically), our politicians, in their eagerness to invite the UN to interfere in Australian domestic affairs, effectively get around the law and democratic impediments by using the following means of 'enforcement'.

- International moral obligations and economic, or market mechanisms
- Building reporting requirements and need for compliance reports into the agreement – Australia has agreed to send regular compliance reports to the UN to prove compliance with UN directives, not only in regard to AG21, but also human rights.

In reality there are many non-legal mechanisms to ensure compliance. These international agreements are however only the first step in a gradual process. The next step in the process is to incorporate the UN's directives into domestic laws. This process is ongoing, but already it is well advanced with hundreds of UN directives incorporated into local laws.

The end game in this process, is to incorporate UN requirements into enforceable international laws. This process is intended to be accelerated in Paris this year.

The point must be made abundantly clear, that those who have been actively involved in this process, or those whose philosophy or ideology supports an abandonment of national sovereignty and democracy in support of globalisation, can be expected to strongly defend these changes.

For instance, In a personal communication **s 47F** advised me that AG21 is a 'non-binding' international agreement which is therefore irrelevant. Similarly, Tim Wilson recently advised me, in regard to the exporting of control of human rights to the UN:

"UN treaties have no binding power. They are only binding to the extent that they are incorporated into Australian law. If it is not in law, it has no legal standing."

The statements of both Greg Hunt and Tim Wilson are notable not for what they actually said, but rather for what they chose to exclude.

s of course, being **s 47F**, as well as having a background in the UN, is well aware of the international mechanisms which are used to ensure compliance with UN agreements. He is also aware that increasingly, Australian domestic legislation is based upon the dictates of the UN. He must also be aware that for 2 decades his political colleagues have been compiling expensive compliance reports to convince the UN we are complying with their requirements. And although he claimed the Commonwealth has nothing to do with local Councils, he must also be aware the Commonwealth has been funding AG21 implementation by Councils, and has even produced a Local AG21 instruction manual. Although he is aware of these facts he chose to exclude all this information when questioned.

As noted above, Tim also tried to dismiss concerns about the UN controlling human rights on the basis that UN human rights agreements are non-binding. Like **s** though, Tim chose to exclude many pertinent facts from his answer.

But even as Tim was answering, the HRC has submitted a report to the UN alleging a violation of the UN Convention against Torture by the Australian government. Although this referral to the UN, and the response of the UN, are claimed by Tim to be irrelevant and inconsequential, Australia has been criticised by the UN for an alleged breach of the convention. Even worse though, the HRC also recommended, in their submission:

"That the government ensure domestic implementation of Australia's international human rights obligations in law, policy and practice.

So as Tim, a human rights Commissioner with the HRC, says there is no need to worry, UN human rights agreements are non-binding, at exactly the same time the

HRC is lobbying the government to ensure UN human rights provisions are made even more enforceable by being enshrined into Australian law. **Interestingly, according to Article 29(3) of the UN Declaration of Human Rights:**

“These rights and freedoms may in no case be exercised contrary to the purposes and principles of the United Nations.”

This is just one of the UN controlled human rights that the HRC is seeking to further enforce upon Australians, but when I questioned Tim to see if this is one of the ‘rights’ he supports for all Australians, he declined to answer.

One of the main human rights Australians need to protect our democracy, is the right to make an informed vote for genuine alternatives. But the right to make a democratic vote, which includes the right to be correctly informed and the right to choose from genuine alternatives, is NOT protected in the Constitution. Clearly, a vote for bipartisan collusion, or a vote made in ignorance of the true covert agenda, is not a democratic vote. This right to make a democratic vote should surely receive top priority for Constitutional reform, but it seems it is not even part of the HRC’s agenda.

Interestingly, Tim Wilson would also be aware that, rather than consolidate our human rights as birthright or god given constitutionalised rights, the Australian government announced in 2010 that they will continue to export the control of the human rights of all Australians to the UN, requiring all legislation to be consistent with UN requirements. **According to the Australian Human Rights Framework:**

“Since its election, the Australian Government has acted to reinvigorate Australia’s engagement with the United Nations. We have issued a standing invitation to the UN to visit Australia to examine the protection of human rights here, sending a clear message that we are committed to our international obligations and relationship with the United Nations. The Government is committed to restoring Australia’s reputation as a good international citizen.....

The Government will introduce legislation requiring that each new Bill introduced into Parliament, and delegated legislation subject to disallowance, be accompanied by a statement which outlines its compatibility with the seven core UN human rights treaties to which Australia is a party.”

While this change was announced by the previous government, such changes are continuing, and are not reversed by successive governments. The general direction remains the same.

Interestingly, while the right to make an informed democratic vote is not part of the HRC’s agenda, recommended constitutional changes to support one particular race (aborigines) are part of the HRC report to government.

Now, as the **OIC** assumes the largest voting bloc in the UN, and attempts to control freedom of speech by outlawing criticism of Islam, we need to be extremely vigilant about who we are placing in charge of our human rights.

When fellow Australians, who we assume are on our side, glibly dismiss concerns by stating international agreements are non-binding, it is pertinent to request a more proactive response in support of Australia, and Australian values.

The direction in which Australia is going is perfectly clear. Australians deserve the truth, a genuine democratic choice. It is simply not the Aussie way to sell your friends and neighbours out behind their backs.

Any system built upon deception, disloyalty, and abandonment of democracy, will have dire consequences.

Regards

s 47F

NATURAL RESOURCES DECISION-MAKERS IN THE AUSTRALIAN FEDERATION: WHO, WHAT, WHEN AND HOW WELL?

AYNSLEY KELLOW'

The Australian Journal of Natural Resources Law and Policy [Vol. 3, No. 1, 1996]

Who, then, are the decision-makers on resources and environmental issues in the Australian federation?

In attempting to answer that question, we should note that the *dramatis personae* change with time. The High Court, once a significant decisionmaker, is now - having breathed new meaning into the Constitution - a much less significant player. But - largely as a result of the Court's decisions - the list of players is no longer confined to Australia. And, with the growing trend towards selfregulation, neither is it confined to governments.

. In an era of increasing globalisation, environmental policy is becoming increasingly international. Global and regional multilateral agreements are increasingly requiring the adoption of national regulatory regimes, and are becoming increasingly specific about the obligations imposed. **Increasingly, therefore, environmental policy in the Australian federation is being made outside Australia and its development is shaped by forces beyond the control of single governments, forces which are not always expressions of the noblest of motives.**

<http://www.austlii.edu.au/au/journals/ALRCRefJl/2000/7.html>

Australian Law Reform Commission - Reform Journal

Boer, Ben --- "The globalisation of environmental law" [2000] ALRCRefJl 7; (2000) 76 Australian Law Reform Commission Reform Journal 33

The globalisation of environmental law has been part of a broad movement in relation to environmental protection internationally. It has been promoted considerably by the conduct of major United Nations conferences on the environment, from the Stockholm Conference on the Human Environment in 1972 to the UN Conference on Environment and Development of 1992 in Rio de Janeiro. The establishment of major international institutions has been a part of these activities. In particular, the UN Environment Program (UNEP) was a result of the 1972 Stockholm conference, and the Commission on Sustainable Development arose out of the 1992 Rio conference.

In addition, the ongoing efforts of UN institutions have resulted in the development of international environmental instruments and programs, the drafting of environmental laws at a national level and training in environmental law.³ The various development banks, including the World Bank and the Asian Development Bank, are also increasingly important players in the process of globalisation of environmental law...

A holistic approach

The need for a holistic approach which incorporates the processes of globalisation and internationalisation, with the aim of promoting sustainable development across the board, is neatly summed up by the IUCN Commission on Environmental Law.

'Concern about the environment as our natural capital should be at the foundation of all local, regional and national development. At the same time, the environment demands global consideration, for it is not compartmentalised into nation-states and certain problems can only be solved by cooperation at the global level.

Conventions & international instruments

The 1990s has seen the negotiation and coming into force of a number of important *generally applicable* environmental conventions, as well as other international instruments, which have had a very significant effect on the domestic law and policy of many countries, including Australia. The following, all arising from the United Nations Conference on Environment and Development of 1992, are the most significant:

- The Rio Declaration on Environment and Development;
- Agenda 21; the United Nations program of action for the 21st century;
- The Convention on the Conservation of Biological Diversity;
- The Framework Convention on Climate Change; and
- The Statement of Forest Principles.

Agenda 21

Agenda 21 is aimed particularly at the achievement of sustainable development across every sector of human activity. It represents a comprehensive framework for the cooperative generation of strategies for sustainable development and environmental management at a global level. *Agenda 21* also explicitly recognises and promotes the globalisation of environmental law and policy.

Chapter 8 of *Agenda 21* deals with the integration of environmental and developmental issues in decision making at policy, planning and management levels, with the overall objective of improving or restructuring the decision making process so that socio-economic and environmental issues are fully integrated. It urges the adoption of a national strategy for sustainable development, to build on and harmonise sectoral economic, social and economic policies in each country. The overall objective, 'in the light of country-specific conditions', is the promotion of the integration of environment and development policies through appropriate legal and regulatory policies, instruments and enforcement mechanisms at every level of government.

Chapter 8 reflects and further promotes a trend towards homogenisation of approaches, policies and principles. In examining developments in national environmental policy, it is clear that the provisions of chapter 8 are beginning to form the basis of decision making on environment and development matters for governments, intergovernmental organisations, non-government organisations and the private sector around the world.

While *Agenda 21* is not legally binding in international law, the major programs and activities that it promotes have had, and will continue to have, a very important influence on developments at a national level, assisted and encouraged by the UN Commission on Sustainable Development.

The Australian experience

In the past several decades, Australia has played a strategic role in global environmental developments, particularly in the negotiation of environmental conventions. It is clear that in this area of international relations it has gained an influence, usually for the good, rather beyond its economic power or normal political sway.

On the other hand, global developments have also had a very important influence in Australia – at a national and state level – in terms of legislative developments. To an extent, this influence has extended to environmental jurisprudence as well. This is recognised by analysts such as Kellow:

‘In an era of increasing globalisation, environmental policy is becoming increasingly international. Global and regional multilateral agreements are increasingly requiring the adoption of national regulatory regimes, and are becoming increasingly specific about the obligations imposed. Increasingly, therefore, environmental policy in the Australian federation is being made outside Australia and its development is being shaped by forces beyond the control of single governments, forces which are not always expressions of the noblest motives.’¹¹

While it is not clear what motives Kellow is referring to, the important point is that the process of globalisation, particularly in a federal system such as ours, means that if Australia is to be able to conform to international standards set through conventions and documents such as *Agenda 21*, our environmental laws must become more uniform, in terms of the principles adopted, the standards formulated (particularly for pollution) the species being protected, and the mechanisms being employed.

One of the more concrete manifestations of this is the negotiation of the Intergovernmental Agreement on the Environment of 1992 (IGAE). The IGAE purports to establish an environmental policy for the Commonwealth, states, territories and local government, in a wide range of areas, under one set of principles – those of ecologically sustainable development.¹² Significantly, most Australian governments signed off the IGAE one month before the UN Conference on Environment and Development of June 1992.

It can be noted that in Australia there are now more than 100 statutes, at federal, state and territory level, which refer to ecologically sustainable development and the various principles associated with it.¹³ On any analysis, this trend is remarkable. However, not so remarkable is the fact that good legislative provisions incorporating these high-minded and well-intentioned principles will not necessarily result in better environmental outcomes. A great deal more work needs to be done at the administrative level to prepare adequate guidelines to ensure change in on-the-ground practices and in the development of jurisprudence through testing of these provisions in the courts.

The latest manifestation of the influence of international environmental law in legislation is found in the *Environment Protection and Biodiversity Conservation Act 1999* (Cth). The Act represents a serious attempt to come to grips with Australia’s responsibilities under a number of environmental conventions, such as the Ramsar Convention on Wetlands and the World Heritage Convention. The Act also adopts the concept of ecologically sustainable development (ESD) and the precautionary principle.

Subject: Join Australia's loudest voice for freedom

Dear s 47F

I would love to welcome you as a member of the Institute of Public Affairs. Watch our new short video explaining why you should join.

The IPA is the loudest voice for freedom in Australia. And we're growing. And we need your support to continue to fight for freedom. We don't get or want any money from the government. We are entirely funded by voluntary memberships and donations from our supporters.

s 47F I would love for you to join the IPA and become part of a community of over 3,720 Australians who are already IPA members. [To join the IPA now, click here.](#)

JOIN NOW

For more information about the IPA and how to become a member, I have included a link to the [IPA's membership e-brochure here.](#)

I look forward to welcoming you as an IPA member soon!

Kind regards,

s 47F

PS. Don't forget, if you sign up today I will add an extra 6 months onto your annual membership and send you a complimentary copy of our book, *Magna Carta: The Tax Revolt That Gave Us Liberty*.

Subject: 'Liberty in the Digital Age' - Sydney, Thursday 11 December

Follow Up Flag: Flag for follow up
Flag Status: Completed

Dear Tim,

I'm pleased to invite you to a special Institute of Public Affairs event - 'Liberty in the Digital Age'.

The event will feature Australia's Human Rights Commissioner, Tim Wilson, and NSW Liberal Democratic Party Senator David Leyonhjelm.

Tim, colloquially known as the 'Freedom Commissioner', is a proud and passionate defender of universal, individual human rights. His work at the Australian Human Rights Commission is focused on promoting and advancing traditional human rights and freedoms, including free speech, freedom of association, worship and movement, and property rights.

David Leyonhjelm has taken up the fight to restore individual liberty from his very first day in the senate on July 1 this year. In his maiden speech he declared: "I pledge to work tirelessly to convince my fellow Australians and their political representatives that our governments should forego their overgoverning, overtaxing and overriding ways. Governments should instead seek to constrain themselves to what John Locke advised so wisely more than 300 years ago - the protection of life, liberty and private property."

The Freedom Commissioner and Senator Leyonhjelm will join the IPA's Chris Berg and myself to discuss the importance of digital liberty and emerging threats to our freedom online. Several policies recently announced by the federal government are likely to have a significant impact on Australians' online freedom. Mandatory data retention threatens to obliterate online privacy, proposed reforms to copyright law would re-introduce Labor's failed internet filter and planned cyber-bullying laws would create a new censorship regime.

Come and hear Australia's Freedom Commissioner, the LDP's Senator David Leyonhjelm and IPA policy experts speak about these important frontiers in freedom.

The details of this event are:

Liberty in the Digital Age
Thursday 11 December 2014
5.00pm for 5.30pm – 6.30pm
The Menzies, 14 Carrington Street, Sydney

Entry is free for IPA members and \$10 for non-members. To secure your place please visit <http://rsvp.ipa.org.au> or call s 47F on s 47F or email s 47F

Warm regards

s 47F

MESSAGE FOR s 47F, do you care about your country?

TURNBULL IS A GLOBALIST, the Australian people are on to it and his belief in
Global warming GARBAGE, surely you are up to speed with Agenda 21,

ITS A UN LED RUSE, I have 21,500 followers on Facebook and not one supports Malcolm Turnbull or Julie Bishop

s 47F you especially need to please consider your country and your constituents
You will likely be one of the 20 who lose their seat if you do not support Dutton and we go to an election.

You only got your seat from the good graces and support of Tony Abbott, turning your back on him was unconscionable

My mums gutted to learn you supported Turnbull, she's one of your constituents, she's 88 years old and a convert to Liberals only because of Tony Abbott, and his conservative values and his refusal to accept anthropogenic global warming

Subject: Alfred Deakin Lecture - The Hon Dr David Kemp - Tuesday 6 May

Hi Tim

This year's 47th Alfred Deakin Lecture will be delivered by the Hon Dr David Kemp, leading academic, former Cabinet Minister and former Liberal Party President at 6.30pm on Tuesday 6 May 2014 at the University of Melbourne.

Dr Kemp will be addressing the topic "Australian Liberalism and Good Government". As you would be aware, each year, the Alfred Deakin Lecture Trust holds at least one public lecture exploring issues relevant to politics and public policy in Australia. (I am currently the Chairman of the Trust, hence me sending this email.)

No issue is more important for good public policy than getting the role of government right, and few countries have had a better opportunity to learn from their history about the appropriate role for government than Australia.

Over recent years, there has been an increasing tendency in many quarters to see government as the solution to every problem whether through regulation, redistribution or service provision.

The media inevitably focus on each new piece of legislation or program, but rarely step back to look holistically at the impact on our economy and society of the changing role of government.

A new administration in Canberra now faces its first budget after a period of unprecedented expansion in government. Businesses are concerned that productivity growth has stalled partly due to government interference in the private sector. Individuals and families are querying whether the "nanny state" is undermining personal responsibility and leading to a generation lacking the resilience to handle life's challenges.

As a former Cabinet Minister, leading academic and former President of the Victorian Division of the Liberal Party, the Hon Dr David Kemp is ideally placed to consider this issue and place it in an historical context in the 47th Alfred Deakin Lecture.

Attendance at the lecture is free. Details for the 47th Alfred Deakin Lecture are:

Venue: Wright Theatre, Medical Building, University of Melbourne, Parkville

Date: Tuesday 6 May 2014

Time: 6.30pm

You can secure a place at the lecture by following this [link](#).

The Lecture will be followed by a dinner where the Hon Alan Stockdale, Federal President of the Liberal Party and former Treasurer of Victoria, will share his reflections on the Lecture.

There are a limited number of places at the dinner. If you would like to attend the dinner, you can secure a place [here](#).

Further details of our lecturer and the Alfred Deakin Lecture Trust are set out below.

Please let me know if you have any questions.

I look forward to seeing you at what promises to be a very timely and thought provoking lecture.

Regards

s 47F

ABOUT THE HON DR DAVID KEMP

The Hon Dr David Kemp is a Fellow of the Australia and New Zealand School of Government, Chairman of the Old Parliament House Museum of Democracy Advisory Council and a Board Member of the Grattan Institute.

Dr Kemp was a Member of the House of Representatives, representing the Victorian seat of Goldstein, from 1990 to 2004. He was a Minister in the Howard Government 1996-2004, and held a number of portfolios in the areas of Education, Employment, Training, Youth Affairs, Environment and Heritage. He was Vice President of the Executive Council from 1998-2004, and a member of the Expenditure Review Committee in the third Howard Government.

Dr Kemp was Professor and Vice Chancellor's Fellow at the University of Melbourne (2005-2010). He was Senior Lecturer in Political Science at the University of Melbourne (1975-1979), and Professor of Politics at Monash University (1979-1990). He graduated with Law and Arts degrees from the University of Melbourne, winning the Hearn Exhibition in Jurisprudence and the Gyles Turner Prize in Australian History. He was a Fulbright Scholar (1968-1971), attending Yale University, where he completed a Ph.D. (with distinction).

Following his parliamentary career, Dr Kemp served as President of the Liberal Party of Australia (Victorian Division) (2007-2011).

Dr Kemp has published extensively on liberalism and its history in Australia. Most recently, he edited "Robert Menzies, The Forgotten People and Other Studies in Democracy".

Dr Kemp was instrumental in founding the Alfred Deakin Lecture Trust, and chaired the first Alfred Deakin Lecture. He continues to serve as a Patron of the Trust.

ABOUT THE ALFRED DEAKIN LECTURE

The Alfred Deakin Lecture Trust was established in 1966 to organise and finance the delivery, printing and distribution of the Alfred Deakin Lecture.

The Lecture is a memorial to Alfred Deakin, a past student of the University of Melbourne, a founding father of the Australian Federation, Prime Minister, and one of the most articulate exponents of the Australian Liberal tradition.

Each Alfred Deakin Lecture is open to the public and it is hoped that the Lectures make a lasting contribution to the study of politics and life in Australia.

Hi s

I really appreciate you sending me this. It's a very good dissection of the issues. What strikes me about so much of the discussion around 18C is just who loose is the language - vilify/hate/bigot are all used interchangeably - which avoids people asking the question whether it should actually be unlawful.

I'll pass this on to Tim.

kind regards s

From: s 47F

Cc: s 47F
Subject: Bigots, Freedom and 18c of the RDA

Please do not feel obliged to answer this email – I am not expecting a response.

Here are a few words/ideas that may be of help when we see people being swept away with the emotional baggage of such words as ‘bigot’, ‘obstinate’ and ‘intolerant’, when the 18c RDA debate is really about tolerance and freedom.

Regards, s 47F

PS. s 47F could you please forward this to Tim Wilson for me.

BIGOTRY AND INTOLERANCE

Bigot: An obstinate and intolerant believer in a religion, political theory etc.

Intolerant: not tolerant, esp. of views, beliefs, or behaviour differing from one owns.

Tolerant: disposed or accustomed to tolerate others or their acts or opinions.

Tolerate: allow the existence or occurrence of, without authoritative interference.

Obstinate: firmly adhering to one’s chosen course of action or opinion despite *dissuasion*.

Dissuade: discourage, persuade against.

The past two generations have been producing a society of intolerant bigots, and rather than reversing this trend, para 18c of the Racial Discrimination Act (RDA) is being sponsored by these intolerant bigots to institutionalise their own bigotry. Do I have your attention?

Bigot: Once you have escaped from the emotional baggage of the word “bigot” and read the definition of this word and all the words used in that definition, you might start to agree with the attention getting statement in the first paragraph.

At first glance, the first person who uses the word ‘bigot’ could justifiably be labelled a bigot himself for “obstinately and intolerably not believing in the first bigot’s religion, political theory etc.” In other words we have a difference of opinion, involving some nasty name calling. However, once you read all the definitions of the words used in the definition of a ‘bigot’ you might come to a different view.

Tolerate. The word “tolerate” in the definition of ‘bigot’ is the basis of the definition of both “Intolerant” and “Tolerant” and consequently should be the focus. The crux of the defence of this first statement above is in the last part of the definition of “tolerate” – “allow the existence or occurrence of, **without authoritative interference.**”

In the past two generations we have had a majority of people who strongly believe in “Authoritative Interference”. So much so, that their methodologies of forcing their views on others have become the norm. Just some examples are, “political correctness”, vilifying and ostracising opponents, or using legislation and all other forms of rules at any level that tell people how to behave, can be considered as “Authoritative Interference”. Those who believe in “Authoritative Interference” do not believe in “Live and let live”.

This “Authoritative Interference” may be acceptable in a small club where everyone agrees but in the wider context where some people are forcing their ideas on others, “Authoritative Interference” becomes institutionalised intolerance. Those enforcers of “Authoritative Interference” are being intolerant of the acts or opinions of those they disagree with. Once you lose your tolerance and a willingness to engage with others, you become more and more sensitive to your own feelings and consequently are more easily offended. You are becoming “soft skinned” and will tend to rant about other persons’ actions and words rather than showing tolerance. This is one shade of being egocentric.

Obstinate. The definition of “Obstinate” does not help further understanding in this matter. The word ‘obstinate’ also has emotional baggage and can justifiably be used by both parties in the same discussion. For example I might be engaged in conversation with 100 lemmings on the top of a cliff. I might be firmly refusing to jump over the cliff because I believe I will die. I might do this despite all their dissuasion that I will not hurt myself. Using the definition, the lemmings are justified in calling me ‘obstinate’. However, I can also correctly use the word to describe the actions of the lemmings.

Using the word ‘obstinate’ in this context is an emotional attempt to bully either party to relinquish their views. A more accurate or balanced word to use would be ‘disagree’.

CONCLUSION

To use the word “Bigot” correctly, you would have to show that that the person was “intolerant”. That is the person does not tolerate: “allow the existence or occurrence of, without authoritative interference”.

Counterintuitively, we often find those using the word are themselves the “bigots”, as they are supporting “Authoritative Interference” to force people to accept their own views.

FYI, attached article on the Tassie situation that will be in the Weekend Aus.

I can't comment on a case as it is ongoing. But I can certainly critique the law.

This is where, with respect, Dominic Perrottet got it wrong. The issue is the law, not the Commissioner, just like 18C. The law basically requires the complain to be accepted.

Hodgman indicated today that he is likely to review the Act in light of this complaint. It'll be in tomorrow's paper.

Best,

Tim

BY EMAIL

Sirs,

I was appalled to receive the attached correspondence from s 47F

I am at a loss to understand how a member of the public WHOM YOU SERVE can be treated so disrespectfully.

You are appointed to maintain the standards, quality and ethics of s 47F, and clearly you have failed on all counts.

Instead of thanking a member of the public for bringing vital world news to your attention, it seems you prefer to skulk and hide from the truth before you. This is disgraceful and brings discredit upon you.

No wonder s 47F is losing its audience when s 47F provides no leadership, honesty or courtesy.

An immediate apology to s 47F is merited.

Yours

s 47F

s 47F

The slaughter of 500,000 by indonesians IS OFFENSIVE THATS THE POINT

s 47F do not wish to be accountable for these distortions and i think there should be a Royal commission or at the least a Senate Enquiry into s 47F NO WONDER a

A DREW BOLT CALLED FOR THE SACKING OF MARK SCOTT in his column this week

I have asked the human rights commission what they have done about the 500,00 people murdered by Indonesian security forces in West Papua.

IN ADDITION, I have concerns that the ABC are manufacturing stories in an effort to unseat the elected Prime Minister Tony Abbott, they reported a vote to have a spill AS A SPILL, ITS UNRELENTING, an advert on another beatup against the PM ADVERTISED TO BE AIRED TOMORROW NIGHT on the ABC

a German Journalist has come out to say that the west NEWSPAPERS manufactures the news, I know this from working at the ABC, in William Street in the news room, and seeing it first hand

I ALLEGE that the board don't like that I know that, and it's important this is exposed

AS A TAX PAYER I DESERVE and have a right to have an answer to my questions

[SEC=UNCLASSIFIED]

Dear s 47F

Thank you for your email.

Discussion is vital so that issues get onto the national agenda.

The issues you raised are multi-faceted and partly reinforcing.

Apart from financial debt, most of these problems cannot be solved by Australian politicians. They can only be resolved with the cooperation of others, including governments that have their own domestic constituencies to worry about.

Kind regards,

Tim

Subject: Debate is not enough, education is needed and a new generation of "politicians"

Re: Your interview in 1 plus 1

We can clearly see that with our current set of politicians, whether ALP or Liberals, we'll not proceed by one millimeter

Question: where is the new generation of politicians who can solve the 4 main problems

- (1) peaking oil production
- (2) disintegration of the Middle East
- (3) financial debt

(4) global warming - CO2 debt

All 4 problems are dynamically linked. My earlier post needs updating

9/11/2011

System Dynamics peak oil, financial and CO2 debt, ME geopolitics

<http://crudeoilpeak.info/system-dynamics-peak-oil-financial-and-co2-debt-me-geopolitics>

Has Abbott any ideas?

(1) zilch

8/9/2013

New Australian Prime Minister is sceptical that peak oil has value for policy making

<http://crudeoilpeak.info/new-australian-prime-minister-is-sceptical-that-peak-oil-has-value-for-policy-making>

(2) Cannot understand link to (1)

16/3/2013

Iraq war and its aftermath failed to stop the beginning of peak oil in 2005

<http://crudeoilpeak.info/iraq-war-and-its-aftermath-failed-to-stop-the-beginning-of-peak-oil-in-2005>

(3) wrong assessment of budget problem

9/6/2014

Australian GDP per capita growth slowed while oil prices went up (part 2 of budget 2014 series)

<http://crudeoilpeak.info/australian-gdp-per-capita-growth-slowed-while-oil-prices-went-up-part-2>

28/5/2014

Australian budget hit by global financial crisis and high oil prices (part 1)

<http://crudeoilpeak.info/australian-budget-hit-by-gfc-and-high-oil-prices-part-1>

Does not see mortgage debt at 80% of GDP

Wants to throw tax payer money at companies which do not pay tax and do not pay back debt

14/8/2012

Transurban does not pay back its debt

<http://crudeoilpeak.info/transurban-does-not-pay-back-its-debt>

27/3/2014

Australian governments want to pay \$810m subsidy for unviable road tunnel in Sydney as next oil price spike looms (part 1)

<http://crudeoilpeak.info/australian-governments-want-to-pay-810m-subsidy-for-unviable-road-tunnel-in-sydney-as-next-oil-price-spike-looms-part-1>

(4) Coal Cowboy in Texas

“For many decades at least coal will continue to fuel human progress as an affordable,

dependable energy source for wealthy and developing countries alike.”

Mr Abbott said the consulate-general Houston would allow Australia to “maximise the two-way trade and investment opportunities of the US energy revolution”.

<http://www.news.com.au/national/tony-abbott-lauds-coal-during-texas-speech-says-climate-change-shouldnt-limit-use-of-fossil-fuels/story-fncynjr2-1226954500305>

8/3/2010

*NASA climatologist James Hansen at Sydney Uni: **"Australia doesn't agree now that they got to stop their coal, but they are going to agree. I can guarantee you that within a decade or so because the climate change will become so strongly apparent that's going to become imperative"

Subject: Re: Comment: s 47F [SEC=UNCLASSIFIED]

"There is nothing inconsistent with free speech and having codes of conduct or policies as a condition of employment that require professional, respectful behaviour in their role and the public domain".

"The public service is not alone in imposing these codes and policies, they are very common".

"Such policies and codes can be a helpful way of normalising civil, respectful behaviour in all aspects of life".

"Voluntary codes play an important role in filling the gap in defining what conduct is unacceptable".

"Specifically, public services codes operate in a grey space because excessive restrictions can fundamentally undermine a public servant's capacity to exercise their full democratic rights, but too loose and they can undermine the impartial work of the public service in supporting the government of the day".

"It is not unreasonable for such policies to apply to conduct directly related to the primary and specific area of work of a public servant, but are unjustified when they are very broad and limit democratic participation".

"Anonymity should not justify exemptions because it can be connected back to the individual and their work".

"Ultimately public servants voluntarily and knowingly choose to accept these limits on their conduct when they accept employment".

Issues Paper available

The Issues Paper for this Inquiry, *Traditional Rights and Freedoms—Encroachments by Commonwealth Laws* (IP46), is now available.

<image006.jpg> [Follow us on Twitter](#)

<image006.jpg> [Email us](#)

IP46 provides a brief explanation of each of the rights, freedoms and privileges listed in the Terms of Reference, their origin and rationale, and how they are protected from statutory encroachment. For each one the ALRC asks the question: What criteria or principles should be used for determining when encroachment is justified? The Issues Paper also invites people to identify Commonwealth laws that unjustifiably encroach on traditional rights and freedoms, and to explain why the laws are not justified.

The Issues Paper is available in HTML, PDF, and as an ebook.

? See [Media Release](#) >>

? See [Issues Paper](#) >>

The ALRC would like to thank Professor Barbara McDonald, who led the ALRC's Serious Invasions of Privacy Inquiry, for providing invaluable guidance and assistance to the team in getting to this important first landmark in the Inquiry. Her experience and expertise are greatly appreciated.

 [Forward to a friend](#)

Dates

Terms of Reference	19 May 2014
Issues Paper	10 December 2014
Submissions to IP due	27 February 2015
Discussion Paper	mid 2015
Report delivered to A-G	end December 2015

Call for submissions

IP46 is the first consultation document for the Freedoms Inquiry. The ALRC invites individuals and organisations to make submissions in response to specific questions, or to any of the background material and analysis provided.

The closing date for submissions is **27 February 2015**.

We prefer to receive submissions via the online form on the ALRC website, but also accept submissions by post and email.

? [Online submission form](#) >>

? [Making a submission](#) >>

Freedoms wiki

In September this year, the ALRC set up a public wiki to create a catalogue of Australian Commonwealth laws that limit or encroach upon traditional rights, freedoms and privileges. The wiki will remain open until the ALRC closes for Christmas break on **24 December 2014**.

Thank you to everybody has already contributed.

? [Information and instructions about using the wiki](#) >>

? [View wiki](#) >>

You can keep up with the Inquiry by following us ([@AusLawReform](#)) on Twitter. You can follow and join conversations about the Freedoms Inquiry using the hashtag [#ALRCfreedoms](#).

Hi s 47F

I hope you are well.

You may recall, when I was previously at the Institute of Public Affairs and extended an invitation for you to come and speak in Australia.

Since then I have left the IPA. Our (now not so) new government appointed me Australia's Human Rights Commissioner. It's an interesting role, especially because I now get to prosecute libertarian values within government. Needless to say the appointment attracted a lot of controversy.

Regardless, the IPA is still keen to have you speak in Australia if you are open to doing so? They asked if I could share your email. Would that be acceptable to you?

Best,

Tim

Tim,

After some more reflection, I think it will be just too difficult for me to get to Australia early next year. There is simply too much on my plate here in s 47F and I will not be able to afford the distraction of an extended trip abroad.

Again, many thanks of thinking of me in this regard. Do let me know if you make it to s sometime, and it would be great to connect in person.

Best,

s

For planning purposes we need to get down a venue ASAP, otherwise we won't be able to get anywhere. Can you give an indication of the likelihood of this date being acceptable, even if it is not confirmed? We can then look at possible venues.

The key thing is that we will need to advertise it by the end of November as Australia basically shuts down from mid-December until mid-February, and if you are coming in late February we will need to push promptly.

Best,

Tim

Subject: RE: Introduction and invitation

Hi s 47F

I hope you are well.

As committed, I am just emailing to see whether you have any clearer indication of your diary commitments next year to speak at an IPA event?

As you may have noted, we have had a change of government in Australia. It is generally good news, tinged with caution. The new government is likely to be much more sensible on economic matters, though they will hardly be perfect and they have major budgetary issues to turn around with little appetite or mandate for serious tax reform. Despite earlier concerns, the recently announced Ministry has very encouraging signs for trade policy.

The big question mark is over social policy. While many in the government are personally socially conservative, they have no real track record of converting it into policy, which is encouraging. The topic of marriage for same-sex couples will come to ahead shortly, but the mood has significantly mellowed.

The most exciting component of the election is that, for the first time, one (and possibly two, yet) Libertarian (Liberal Democratic Party) Senators have been elected and will share in the balance of power from 1 July next year. Strategically used, they could use their political muscle to bring about some positive reform and help wind back the paternalistic, nanny state culture that has been imposed over the past few years.

As a consequence there is certainly an appetite for a strong classical liberal / libertarian voice in public debate and a visit would be most opportune.

Kind regards,

Tim Wilson

Thanks s 47F

That's great. At this stage there's no urgency. We need about four months to plan such an event so we can promote it properly etc. and make it worth your effort.

With the introduction I was just looking to see whether you are open to the idea. We cannot do anything on this scale until 2014 because we have already had our major event with s 47F this year.

So it largely depends on your schedule. Do you have any dates in mind?

Best,

Tim Wilson

Subject: Introduction and invitation

Dear s 47F

Thank you for agreeing to be contacted.

As introduced, my name is Tim Wilson. I know s 47F through his excellent work for s 47F. I do similar work to s 47F in Australia, though there is no formal organisation and we thankfully have slightly smaller hurdles.

During the day I am a policy director for the Institute of Public Affairs. The IPA is the world's oldest free market think tank. We were founded in 1943 and we are celebrating our 70th anniversary this year.

Like US free market think tanks, we promote classical liberal solutions on economic and social issues in public debate. We heavily focus on engaging in public debate and do a lot of work in the media fighting for classical liberalism.

To celebrate the IPA's 70th anniversary we recently had a major dinner in Melbourne with guest speaker, Rupert Murdoch. Rupert gave a wonderful speech on the morality of capitalism. In Australia there are too few business leaders to stand up for capitalism on an economic basis, let alone a moral one. If you are interested you can watch his speech here: <http://www.youtube.com/watch?v=ZbqLO1TBnGo>

As part of our forward planning for 2014 the IPA is thinking about which global figure we could invite who has a strong commitment to the values the IPA promotes, has a record of success and could 'top' Rupert Murdoch. My colleagues and I thought of you.

So I am emailing to introduce myself, the IPA and see whether you would consider coming to Australia next year to speak at a major event for the IPA?

If you were prepared to do so we would be happy to coordinate dates around your availability and, of course, would pay your costs.

s 47F

I realise you are incredibly busy and it is difficult to know what you are doing in 2014, but greatly appreciate your consideration of our invitation.

If you would like to discuss my email don't hesitate to send me your contact details and I am happy to call you at a time of your convenience.

Yours sincerely,

Tim Wilson

Hi Tim

I'm currently helping to organise a national tour on online freedoms for the IPA. I understand you had previously been approached to be a part of the tour in your capacity as human rights commissioner. I'm emailing to ask whether you are still interested in speaking at the events to be held in Melbourne and Sydney.

We are looking at holding the tour across the first two weeks of November – Wednesday 5, Thursday 6, Tuesday 11, Wednesday 12 and Thursday 13 November. We would love for you to be a part of the events in Sydney and Melbourne. Are you available on any two of the dates above? We are happy to work around your schedule. The events will run from 5.30pm until around 7.00pm.

If you could let me know whether you're available to attend and speak that would be greatly appreciated.

Warm regards

s 47F

Cc: s 47F
Subject: RE: Human Rights and US FATCA

Dear Tim

Here is a very important human rights issue for the Human Rights Commission to take up – the implications of US FATCA legislation and inter-governmental information sharing for privacy and due process rights.

It is a complex subject but essentially the US is asserting extra-territorial rights to impose penalties and bankrupt Australian citizens (which it deems to be US persons) for US taxes or penalties (often huge even though no tax was ever evaded) which the US claims as due on income or investments lawfully made by Australians in Australia. Why should the Australian Federal Parliament enter into agreements or treaties which leave Australians exposed to foreign penalties for things lawfully done here? (e.g. the US claims taxes on Australian superfund benefits accruing for dual citizen members

living here and who may never have set foot outside Australia!). I wonder if the taxation power and the external affairs power would justify such intrusions.

It is a big issue in Canada where there are up 1 million Canadians affected as deemed US persons.

Here is a link to a Canadian FATCA Forum in December 2012 and I attach a couple of articles I have written on information exchange (a sort of global tax Gestapo or Stasi).

<http://www.youtube.com/watch?v=ij2I9dHWuUE#>

<http://www.youtube.com/watch?v=xZhcsiuyDuc>

But the issue is fundamentally one of privacy, due process and proportionality – which is why there has been a hostile reaction from many law-abiding people to revelations emerging from Wikileaks or Mr Snowden. On the Lockean theory, people are happy to surrender a part of their liberty for protection but that does not mean they agree to surrender all to government.

I haven't noticed a peep from the Privacy Commissioner but surely it is the duty of a sovereign to protect his subjects from foreign assaults on their property, privacy or liberties.

Kind regards

Dear Tim

I trust as Human Rights Commissioner you will look at things like wholesale invasion of our financial privacy without warrants via AUSTRAC and the pre-emptive seizure of assets by authorities so that the accused can't pay lawyers to mount a defence or resist a tax demand plus the absurd crime of "failing to suspect" money laundering (Julia Gillard might usefully have removed that last one – if only in her own interests!). And how curious you can be charged with money laundering for dealing with your own money when the ATO thinks you were taxable on it – a very nice way of doubling up the charge sheet. Not to mention spouses being forced to testify against each other...

We are so far from the ancient liberties of the subject in the face of totalitarian government on all fronts (and there is usually a well-sounding excuse for all these legislative assaults) I fear we shall never get back to common law and common sense. Best of luck!

Best wishes

Dear Tim,

Thanks for your reply.

You and I certainly agree on these points, and they are an everyday tension for some of us s 47F. My concern is that we can do so much better, but struggle to get even the modest Lomborg proposal past the gatekeepers!

Cheers,

s 47F

On 12/05/2015, at 3:52 pm, Tim Wilson <Tim.Wilson@humanrights.gov.au> wrote:

Dear s 47F,

Thank you for your email.

My concern about the University's response to the Lomborg Centre was not based on my support for it, or not.

My concern was that we have a culture of soft censorship where even questioning public policy priorities is no longer tolerated within a public University, even if it is only debating the allocation of government resources.

Unfortunately this latest period brings into question the preparedness of our public Universities to pursue intellectual inquiry.

However, I do appreciate your email and analysis.

Best wishes,

Subject: Lomborg centre: better, perhaps, but not good enough

Dear Tim,

It has been great to see you and others writing in *The Australian* on the strange situation of the rejection of the Lomborg centre by UWA. Despite the hysteria of the opponents and the nominally scientific approach, however, the proposed centre would not have provided much counterbalance the standard big-government-is-best views coming out of academia...

Government-funded research typically has the objective of supporting predetermined policy preferences. The proposed Lomborg centre's cost-benefit approach represents an improvement.

The cost-benefit approach is scientific, in that it recognizes that the rational way to allocate scarce resource is by maximizing net benefit. The unscientific alternatives of allocating resources confiscated from taxpayers on the basis of opinion, however well intentioned, favouritism, or the personal ideological preferences of the allocator surely amount to unethical stewardship.

The proposed centre falls short, however, because the approach that it would use ignores theory and evidence that governments' attempts to regulate and reallocate are expected to, and do, fail to provide net benefits. That approach accepts as true the conceit that clever elites will better allocate the resources of private citizens than they themselves can.

By not giving full consideration to the policy option of leaving resources with their owners, Lomborg's approach fails to take account of cumulative knowledge. That we should not rely on rulers to look after our best interests is hardly a new idea; witness the biblical injunction to "put not your trust in princes, nor in the son of man, in whom there is no help."

The evidence on the failure of government interventions to improve people's lives continues to mount. s 47F

Moreover, Lomborg's consensus-of-experts method for determining costs and benefits is unscientific. It relies on unaided judgment and authority. What is needed instead is forecasts of costs and benefits from validated (i.e., evidence based) methods. While evidence-based methods do make use of experts' judgments, how those judgments are used to derive forecasts is critically important for the accuracy of the forecasts.

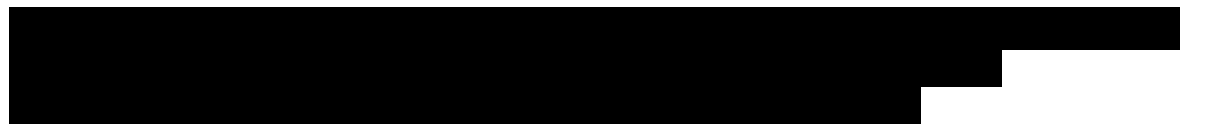

The proposed centre's approach is, therefore, unscientific in at least four ways. The approach: (1) ignores cumulative knowledge and economic theory, (2) fails to test the obvious alternative hypothesis of laissez-faire, (3) uses invalid methods to forecast costs and benefits, and (4) relies on consensus and authority as the basis for policy recommendations.

The proposed centre would not be unusual in those failings; they are the same as those of every endeavour funded to conduct research to support the dangerous manmade global warming alarm movement, for example. There is *no reason* to expect the policy recommendations of either would, if adopted and even perfectly implemented, lead to a better allocation of resources. Not even if one were to believe that to increase total net welfare it is acceptable that some individuals are made much worse off.

In sum, and in contrast to the assumptions of the proposed Lomborg centre, nothing we have learned over thousands of years provides a logical basis for rejecting the biblical injunction

to “put not your trust in princes...” and replacing it with the diktat to “put your trust in the judgments of professors and their colleagues in politics”.

We are fortunate to be living at a time when the science of forecasting is a well-developed body of knowledge. That knowledge is readily available from the ForecastingPrinciples.com website. s 47F

An Age of Enlightenment in forecasting the costs and benefits of proposed public policies is ours for the taking. We would all benefit from better policy decisions.

Best wishes,

s 47F

Hi Tim

We're having a lunch for IPA donors and friendly journos in Sydney on Thursday – it would be great if you are able to join us. Let me know. See invitation below:

s 47F

s 47F

The details of the lunch are:

s 47F [REDACTED]

I hope that you can join us to hear s 47F [REDACTED] insights about the direction of the new majority government, Britain's future with the European Union and the future of the United Kingdom itself following the rise of Scottish nationalism. s 47F [REDACTED] will also offer an insider's account on how the Conservative Party triumphed in the recent General Election and what lessons centre-right parties around the world can learn from their victory.

Kind regards

s 47F [REDACTED]

Hello Tim,

Our s 47F is wondering if you would consider a lunch time

event in s 47F in May. For you to be our key note speaker , for s 47F

.

Your new position creates opportunities to raise issues onto a national level.

s 47F has agreed to participate.

Funds raised would flow into s 47F

Tim if you cannot attend, could you please advise suitable speakers

Cheers.

Kind Regards,

S 47F

[<http://www.bluecast.com.au/images/ipa/Hey/hey-what-did-i-miss2.jpg>]

From s 47F | Thursday, 24 September 2015

In April, we told you household goods were getting a lot cheaper - thanks to economic freedom<<https://www.bluecast.com.au/lt.php?c=4426&m=3289&nl=45&s=adcbaa1dded84d9344196ff1978be354&lid=39678&l=-http--hey.ipa.org.au/2015/04/does-joe-hockey-watch-game-of-thrones/>>.

Food is getting dramatically cheaper too, as this chart from a forthcoming research paper by the IPA's Dr Mikayla Novak shows:

[https://www.bluecast.com.au/images/ipa/Hey/hours_to_buy_2015_FINAL.jpg]

Imagine how cheap food would be if WA didn't threaten to jail<<https://www.bluecast.com.au/lt.php?c=4426&m=3289&nl=45&s=adcbaa1dded84d9344196ff1978be354&lid=39683&l=-https--au.news.yahoo.com/thewest/wa/a/29606729/spud-king-jail-me-and-look-like-jokers/>> freedom-fighting farmers like Tony Galati for growing too many potatoes! We've told you about WA's spud tsar in Hey before - as far back as 2012<<https://www.bluecast.com.au/lt.php?c=4426&m=3289&nl=45&s=adcbaa1dded84d9344196ff1978be354&lid=39684&l=-http--hey.ipa.org.au/2012/04/monkeys-high-on-american-stimulus/>>.

Tony will be in good company in jail though if these 20 climate scientists, who wrote to President Obama this month, get their way<<https://www.bluecast.com.au/lt.php?c=4426&m=3289&nl=45&s=adcbaa1dded84d9344196ff1978be354&lid=39685&l=-http--dailycaller.com/2015/09/17/scientists-ask-obama-to-prosecute-global-warming-skeptics/>>. You can read their original letter, calling for a federal racketeering and corrupt organisations investigation into climate sceptics, here<<https://www.bluecast.com.au/lt.php?c=4426&m=3289&nl=45&s=adcbaa1dded84d9344196ff1978be354&lid=39686&l=-http--www.iges.org/letter/LetterPresidentAG.pdf>>.

It's in part because of the left's embrace of such authoritarianism that the British writer Nick Cohen has renounced them. Read his brilliant essay<<https://www.bluecast.com.au/lt.php?c=4426&m=3289&nl=45&s=adcbaa1dded84d9344196ff1978be354&lid=39687&l=-http--www.spectator.co.uk/features/9637452/why-ive-finally-given-up-on-the-left/>> for this week's Spectator on why Jeremy Corbyn and his supporters finally drove Cohen to quit the left.

Talk about buyer's remorse. The Nobel Committee is starting to wonder<https://www.bluecast.com.au/lt.php?c=4426&m=3289&nl=45&s=adcbaa1dded84d9344196ff1978be354&lid=39688&l=-https--www.washingtonpost.com/news/worldviews/wp/2015/09/17/obamas-nobel-peace-prize-didnt-have-the-desired-effect-former-nobel-official-reveals/--Q-tid--E-sm_tw> whether President Obama really did deserve the encouragement award/Nobel Peace Prize just eight and a half months after he took office.

But - credit where credit is due - last week President Obama gave this terrific answer<https://www.bluecast.com.au/lt.php?c=4426&m=3289&nl=45&s=adcbaa1dded84d9344196ff1978be354&lid=39689&l=-http--www.huffingtonpost.com.au/entry/obama-college-political-correctness_55f8431ee4b00e2cd5e80198--Q-section--E-australia--A-adsSiteOverride--E-au> about the stifling political correctness at universities.

If Lord of the Flies were written by today's politically correct university students, it might read something like

this<<https://www.bluecast.com.au/lt.php?c=4426&m=3289&nl=45&s=adcbaa1dded84d9344196ff1978be354&lid=39690&l=-http--www.newyorker.com/humor/daily-shouts/politically-correct-lord-of-the-flies>>, in The New Yorker this month.

And Ahmed the clock-maker is just the latest in a long line of students harshly punished by overzealous school

administrators<https://www.bluecast.com.au/lt.php?c=4426&m=3289&nl=45&s=adcbaa1dded84d9344196ff1978be354&lid=39691&l=-http--dailysignal.com/2015/09/16/ahmeds-clock-and-the-hysteria-of-american-schools/-Q-utm_source--E-heritagefoundation--A-utm_medium--E-email--A-utm_campaign--E-morningbell--A-mkt_tok--E-3RkMMJWWfF9wsRohs6zOZKXonjHpfSx56%2BktWKC11MI%2F0ER3fOvrPUfGjI4ATcBhMa%2BTFAwTG5toziV8R7jHKM1t0sEQWBHm>, as The Daily Signal explains.

Tim Wilson; s 47F

Subject: The latest on Bjorn Lomborg

I wanted to update you about the campaign to protect academic freedom in the wake of the University of Western Australia's decision to renege on its pledge to host Bjorn Lomborg's Australia Consensus centre.

Our friends at the Australian Taxpayers Alliance are raising funds to place full page advertisements in national and West Australian newspapers taking issue with the decision and urging the UWA to think again. [You can donate by clicking on this link.](#)

In addition the Menzies Research Centre is planning to host a symposium on academic freedom on the UWA campus in August. We are seeking funds to fly in national and international speakers for this important event. [Find out how to make a tax deductible donation to the Menzies Research Centre's Public Fund by clicking here.](#)

There was an exceptional response to [my column in *The Australian* on the subject last week](#). Clearly many people feel, as I do, that the UWA decision is indicative of the narrowing of intellectual diversity on campus.

Kind regards

s 47F

Subject: The Repeal of the Racial Discrimination Act

Dear Tim

I am aware that you are a fierce advocate of the repeal of 18C and an indefatigable supporter of democratic principles. The inexplicable retreat of Senator Brandis from the process of repeal of 18C is of huge concern. s 47F

How things change.

Kind Regards

s 47F

Dear s 47F

While every voter understands that a responsible government governs for all, there is nothing so dispiriting for a voter than to see a government retreat from an election position that is either explicitly or implicitly held.

I refer to the Coalition's platform on the repeal of the odious 18C of the Racial Discrimination Act. There is no question that Coalition supporters were led to believe that, if elected, the Coalition would repeal 18C of the Act. It is therefore little less than shocking that you not only appear to be retreating from that position, but actually appear to be considering an

extension of the limitations on freedom of speech (The Australian, 31st January 2014).

This is a cause for despair in voters who value the principles of liberty that underpin our democratic way of life. I cannot think of a greater rebuff to those who fret about the erosion of democracy in the free world.

I can only tell you that the retreat on this issue by the government would be a blow that will not be forgotten.

Regards

Hello Tim,

just following up on the below to see whether I can confirm the s 47F event for Tuesday 25th March, 6.15pm-7.15pm.

At this stage, s 47F is not able to make it, but s 47F will be in Melbourne and we're hoping she might be able to squeeze it in.

Please let me know whether we can count you in asap - and of course whether you require any more details.

If the 25th is looking like a problem, Tuesday 8th or 22nd April are possible alternatives (same evening time slot).

Cheers,

s 47F

To: s 47F

Subject: s 47F

Hello Tim,

Further to our quick phone chat, I'm writing to ask whether you might be interested in joining us for a s 47F in the next month or two.

As you know, the s 47F is one of Melbourne's newest, and liveliest cultural institutions, running a year-round programme focussed on books, writing and ideas.

s 47F

– we'd be hoping for Tim Soutphommasane (Race Discrimination Commissioner) and Elizabeth Broderick (Sex Discrimination Commissioner) – for a look at discrimination. It would involve a 45 minute discussion followed by 15 minutes of Q&A – conversational in tone, no speeches or presentations need be prepared.

s 47F

. The event will be recorded, with video and podcast made freely available on our website as part of our growing archive of resources (the podcast for this series alone has a large subscriber base). ABC Radio National would also likely record for broadcast. Speakers are offered an honorarium of \$500 and our preferred date would be **Tuesday 25th February** from **6.15pm-7.15pm**. If that's just too soon after you begin your new appointment, 11th or 25th March, or 8th or 25th April are also options.

Do let me know whether you have any questions, and of course the time and inclination to participate, as soon as you can. It would be great to have an indication of your preferred date, so I can get in touch with other panellists sooner rather than later.

Thanks Tim and all best,

s 47F

It usually works the other way. Politicians or more often their advisors slave away for years brown nosing the usual suspects so they can leave and luxuriate in some appointed statutory position often for life or some other long period of time. For instance if one were to delve deeper into the government's proposed new regulatory authority over unions , which will of course need a new board of Commissioners, (why not just give the job to ASIC?) you will find that the originator of the arrangement will have lined up one of the board roles for himself.

Most people can't even imagine having an income of \$400k let alone voluntarily giving it's up. For what it is worth the only difference between \$400k and 4 or 5 times that figure is the size of the exclamation you give when your accountant tells you how much extra tax you have to pay. Life's style doesn't change that much. You can only eat three meals a day and sleep in one bed at a time etc etc

So more power to you for giving up the "cushy" for the unpredictable and feckless life of the polle.

I see the Liberal establishment are lining up behind the Downer lass with the usual "establishment endorsements". Me thinks this is not the time for understatement. Let them know that what is needed is a fresh and authentic voice, rare in Australian politics. You might look at appealing directly to the pre selectors claiming that the only people you will be beholden to is them not some "endorser". To accept the endorsement from a celebrity is an insult to the pre selectors who are presumed to be too dumb to make up their own minds. Andrew Robb was a great listener, (as was Howard and Reith.) The pre selectors will be used to openly voicing their views to their local member who was famous for listening to them. Most pollies just talk, and usually drivel. Robb is one of the few exceptions to that rule. Might be wise to remember that and play to their expectations. Give them a good listening to, then give authentic voice to their concerns. Their deeply felt concerns will be little different from the rest of us so you can prepare your responses. If they are smart, and most active party members are, you should get up.

Anyway good luck

It is with much pleasure I must acknowledge that I was wrong. Although I didn't tell Tim this at the time, I thought that his appointment as a \$400k pa salaried Commissioner would transmogrify after about 6 months to the same situation as all the others. IE He would start believing he was actually worth \$400k pa for traipsing around the country lecturing us about our bad manners. (After all that is what all discrimination is about)
To my enormous pleasure I find that I was wrong and he is going to give it all up for a shot at Andrew Robbs seat.
Good for him and my apologies for doubting him
Cheers

On 5 Dec 2014, at 9:51 am, "Tim Wilson" <Tim.Wilson@humanrights.gov.au> wrote:

Dear s 47F

Thank you for your email.

For the past few months I have been engaging in a nation-wide consultation looking at the human rights issues that exist, and where there is a degree of political opportunity to advance reform, and what I will be focusing on in 2015.

For the article I was asked what the top three issues are. They are:

1. Property rights reform, particularly removal of barriers for Aboriginal Australia to exercise their property rights. I am particularly interested in this one because it leads to a broader discussion about property rights being essential to the human rights discussion, secondly it shifts the discussion from not just about having rights, but focusing on the necessity that people have to be able to exercise them. Too many people engage in the hypocrisy of saying they respect rights, but then don't believe people should have the freedom to exercise them. Property rights is the most glaring exercise. Thirdly because it is a good entry point for discussion into restrictions on property rights more generally, and particularly those affect that connect with younger Australians because restrictions on property rights undermine housing affordability.
2. Religious freedom, particularly because it is being marginalised in the public square, and because there are tensions between preserving religious freedom, and the principle of equality before the law, in a pluralistic liberal democracy with a secular state. There is a desperate need for a respectful discussion surrounding these issues.
3. Issues surrounding sexual orientation, gender identity and intersex status, particularly around basic access to health and education services which are not being addressed and need to be to ensure everyone is being treated equally by government.

I was only asked for three, but did identify for *The Australian* that my fourth and fifth are:

4. Freedom of speech, particularly reform of Section 18C of the Racial Discrimination Act, as well as many other laws at a State level. You may note we ran a major conference on free speech in August, however the political

appetite to address these issues is disturbingly low. This is an ongoing task and one that has not been shelved in the slightest.

5. Human rights education, particularly the full history of human rights, not just the Universal Declaration of Human Rights and post-1948 events and treaties. And more importantly to educate many so-called human rights groups about what human rights actually are. This is sorely needed within the entire education system, because an absence of proper and correct education on human rights means we are not actually teaching the next generation of Australians the very foundations of our free society. The 800th anniversary of Magna Carta provides a window of opportunity to correct this balance. I wrote about this broad theme earlier in the year. A copy of the article can be found [here](#).

You are welcome to disagree with me on my priorities, but I want to seek and achieve reform. Not all aspects of that are within my control.

Kind regards,

Straightforward Santa

Subject: Tim Wilson the dodgy santa?

Tim Wilson the dodgy santa?

Instead of advocating for genuine law reform (the overarching Federal *Freedom of Expression Bill* or *Freedom of Political Communication Bill* that leading politicians have before them but the media refuse to discuss, and a referendum for a US style First Amendment) Tim Wilson insults the intelligence of all Australians with his unwanted Christmas present.

Apparently he now thinks freedom of expression is no longer a right that really counts (Canberra attack on basic freedoms, Legal Affairs, 5/12) but only property, religious freedom and sexual orientation rights do. Has he joined the minority groups who now rule our nation - turning Australia from a democracy into a minocracy? Is he now champion of bikie gangs, religious fundamentalists (niqab wearers) and those gays who want hate speech laws to benefit them too?

Perhaps he now truly belongs at the Orwellian Human Rights Commission.

*Note: I expect the usual censorship from **s 47F**. Their support of free expression has always been tokenistic - designed to return a compliant Government and protect their own rent seeking monopoly in the so called free market of ideas. The border must be kept open so the elite can profit from mass unselective immigration? The population must be controlled and 're-educated' so that they make each and every cultural concession that the new superdiverse electorate demands? The resulting problems must be hidden and cannot be spoken of? True speech is hate speech? Slavery is freedom? Big brother knows best!*

Subject: Voluntary Euthanasia and human Rights

Tim Wilson
Australian Human Rights Commissioner

Dear Tim

I was very interested in the question Sarah Edelman posed to you on Our Say, relating to the "Liberal" Party and their ultra conservative approach to the issue of voluntary euthanasia and assisted dying, and whether those dying with a terminal illness should have a Right to request an assisted death. I must say I am confused and disappointed with your response.

For instance, you said –

"I don't think there has been a robust enough discussion"

- FACT. There has been debate and discussion on this issue in various Australian Parliaments since **1995. Surely 20 years is long enough!** There have been more than 30 attempts to pass legislation in Australia in those 20 years, including at least 15 attempts in South Australia alone. (Ref page 36 of the Australia 21, background paper, *How should Australia regulate voluntary euthanasia and assisted suicide?* <http://www.australia21.org.au/wp-content/uploads/2013/08/ASAssisteddyingBP1.pdf>) As you know the Northern Territory did pass legislation in 1995, only to have it overturned by a Federal Liberal Government.
- FACT. In addition to Parliamentary debate there have been numerous inquiries, reports, reputable polling showing 70 -85 % support, opinion pieces, and forums such as the Australia 21 Roundtable. For example please read the Australia 21 Report http://www.australia21.org.au/wp-content/uploads/2013/08/J2056-Assisted-Death-Report_WEB.pdf
- FACT. So many people wanted to hear the Professor Peter Singer vs Catholic Archbishop Fisher debate on Thursday 13th August 2015 that the venue had to be changed from Sydney University Great Hall to the Sydney Town Hall, with 2000 attending. This shows the considerable interest in this issue. Please take the trouble to read this report on the debate – <http://www.dailytelegraph.com.au/rendezview/forget-expense-accounts-politicians-need-to-talk-about-voluntary-euthanasia/story-fnpug1jf-1227483377440> With respect, do the last two sentences in this report apply to you as well as to many of our MPs - I trust not?

FACT. The 100's of submissions to the De Natale Inquiry and the Victorian Inquiry into End of Life Choices are still more examples of discussion. The high rate of polling in these three ABC Vote Compass polls also indicates considerable public interest in the issue compared with other issues – For NSW <http://www.abc.net.au/news/2015-03-15/nsw-voters-support-euthanasia-vote-compass-finds/6313864>

For QLD - <http://www.abc.net.au/news/2015-01-28/vote-compass-majority-of-queenslanders-in-support-of-euthanasia/6049750>

For VIC - <http://www.abc.net.au/news/2014-11-23/victorians-back-voluntary-euthanasia-vote-compass/5910668>

"we haven't really had that discussion around what type of law and how can that be achieved, and how can safeguards be in place"

- FACT We have had that discussion. Please refer to Point 1. The original Northern Territory Act and Regulations would be a useful starting point for the type of law and appropriate safeguards.
- FACT. Oregon USA has had assisted dying legislation working well since 1997. Washington State and Vermont have essentially copied the Oregon legislation. Australia does not have to reinvent the wheel!!!
- FACT. Quebec province in Canada held a Parliamentary Inquiry over two years into End of Life Choices. I have attached a summary of the findings. In June 2014 this report lead to the Quebec Parliament passing an *Act respecting end-of-life care*, which allows terminally ill patients to choose an assisted death. The vote was 94 in favour and only 22 against, and all

four political parties WORKED TOGETHER to achieve this result. The Act was passed with a standing ovation! Please note the similarity between the name of this Act and the title of the current Victorian Inquiry.

- FACT. It was thought there would be a challenge to this Quebec legislation, but instead - **The Supreme Court of Canada**, February 2015, in a unanimous decision by 9 judges has stated "The prohibition on physician-assisted dying infringes the right to life, liberty and security of the person in a manner that is not in accordance with the principles of fundamental justice," and has given the Canadian Parliament 12 months to introduce legislation to comply with the Supreme Court guidelines.

There can be no doubt that this "fundamental justice" should also apply to all Australians!

"it also needs to ally with what the politicians are interested in doing." You will note that Sarah's question referred to the "Liberal" Party, and their belief – *"We Believe: In the inalienable rights and freedoms of all peoples; and we work towards a lean government that minimises interference in our daily lives;....."*

- FACT. On analysing three recent votes on assisted dying we find a result totally inconsistent with this "Liberal" philosophy, given that it was a so called "conscience" vote!

- NSW on Faehrmann Bill: Labor voted 8 For / 5 Against = **61.5%** in Favour of VE. Coalition voted 14 Against and 4 abstentions = **0%** in favour;
Tasmania on Giddings/McKim Bill: Labor vote 7 / 3 = **70%** in Favour of VE. Coalition voted 10 Against = **0%** in favour;
WA on Chapple Bill in 2010: Labor voted 6 / 5 = **54.5%** in Favour of VE. Liberals voted 15 Against = **0%** in favour. Nationals voted 1 / 4 = **20%** in favour;

There is an obvious trend. If the Liberals had voted with the same proportions as Labor on this apolitical topic, there would now be 4 out of 6 States in Australia with VE legislation. It is only the Liberals and Nationals who consistently vote against VE legislation. It is statistically impossible that in a conscience vote on three Bills in three States not one Liberal MP is in favour, given that 4 out of 5 Australians are in support!

Question: I would appreciate your view as Australian Human Rights Commissioner as to the morality of Liberal MPs denying this Right of choice in dying to Australians in this way.

As has been pointed out to me since your response on My Say: "Surely it is the role of Australia's Human Rights Commissioner to champion rights issues irrespective of the government's appetite to discuss them?"

"there is interest in issues around end of life care for instance in the Victorian Parliament".

- FACT. If you take the trouble to read the submissions to this Inquiry, you will find that the vast majority published so far discuss the importance of assisted dying and/or voluntary euthanasia and are in support of it as part of end of life care.

"It's much more of an issue of laws and safeguards to make sure that the rights of people who wish to continue to live are never violated".

- FACT. Sarah's question was specific to the terminally ill. By definition a person who is "terminally ill" is going to die even though they may wish to live – otherwise their illness is not terminal!

- FACT. All members of my group, *Christians Supporting Choice for Voluntary Euthanasia*, would agree that the terminally ill need to be treated with compassion and care, supported by family, friends and the community, and treated as precious members of the human family.

We also believe that palliative care provides an essential service for the dying. However we know that the facts show even the best PC does not provide adequate relief of suffering to 2 to 5% of those dying. Symptoms such as uncontrollable vomiting of blood and faecal material due to an inoperable blocked bowel, is an example where pain relief is not effective.

The last resort in palliative care, when all else fails, is to put the person into a **medically induced coma, known as terminal sedation**, where they gradually starve or dehydrate to death, a circumstance that family and the nursing and medical staff can find extremely distressing to watch.

Terminal sedation is accepted by the medical profession and the Catholic Church as an appropriate and religiously ethical last resort, as the stated intention is 'to relieve suffering'. No reporting is involved, and the patient need not even be asked.

Yet if the dying patient requested, "Rather than starve me to death in a coma, with the trauma of having my family watch this slow death, please give me the next few days medication in a single dose", this would be illegal.

Question: As the Australian Human Rights Commissioner would you please explain to me why it is morally acceptable for Australians to have the "Freedom" or the "Right" that the slow death procedure should be within the law but not the other alternative?

Question: As the Australian Human Rights Commissioner, can you please point me to the "laws and safeguards" currently in place that ensure the Rights of the terminally ill in the context of terminal sedation are not violated?

- FACT. Dr Rodney Syme has made a mockery of the existing law in Victoria on assisting a suicide and challenged the DPP to take him to court. This has not occurred. Why? Because the public would believe that the Dr Syme is acting with due care and doing the moral and ethical thing to relieve the suffering of the dying patient by providing the patient with the means to end their life quickly, at a time of their choosing, without further suffering.

"There isn't much interest in that, in the interest of Euthanasia at the moment."

- FACT. Each week there are currently between 10 to 30 references to articles and opinion pieces on voluntary euthanasia or assisted dying in the media in Australia. If you are interested I can arrange to have you included in the group email each week providing links to these articles.

"I'm most open to having that discussion."

- FACT. I have attached my submission to the Victorian Inquiry to help get this discussion rolling. I have also attached RIP Keith – a piece typical of why people want the Right and Freedom to have legal choice in dying. I can provide many more files if you wish to discuss the issue with me further. I feel sure the other Dying with Dignity and Voluntary Euthanasia groups in Australia would be willing to do the same.

- FACT. On an issue involving ethics, morality and the Rights of the individual I find the recent comments by two prominent Anglican Christian leaders very relevant. Lord Carey, former Archbishop of Canterbury and head of the world wide Anglican church, speaking in support of the Falconer Assisted Dying Bill before the House of Lords, UK, said: it would not be "anti-Christian" to ensure that terminally ill patients avoid "unbearable" pain, and "One of the key themes of the gospels is love for our fellow human beings ... Today we face a terrible paradox. In strictly observing accepted teaching about the sanctity of life, the church could actually be sanctioning anguish and pain – the very opposite of the Christian message." (Ref : <http://www.theguardian.com/society/2014/jul/12/archbishop-canterbury-carey-support-assisted-dying-proposal>) and in a more recent statement Lord Carey said: *Assisted dying would be 'profoundly Christian and moral'* (Ref <http://www.telegraph.co.uk/news/religion/11799620/Assisted-dying-would-be-profoundly-Christian-and-moral-former-Archbishop-of-Canterbury.html>)

Former Archbishop Desmond Tutu, one of the most revered religious leaders, also speaking in support of the Falconer Bill said: *"I have been fortunate to spend my life working for dignity for the living. Now I wish to apply my mind to the issue of dignity for the dying. I revere the sanctity of life - but not at any cost."* (Ref : <http://www.bbc.com/news/uk-28282323>)

I look forward to your considered response to the points and questions I have raised.

Yours sincerely

-

Sure.
Thanks
I'll check with him about dietary requirements ... or do you know if he has any?

Hi Tim

Following from our conversation earlier this week, I'd be delighted if you could provide me with a ticket to Free Speech 2014. If that's possible, I'll book my flights today.

Warm regards

Thanks. So from this email I should assume that we are now having lunch on the Saturday? And by that Saturday you mean the Victorian State Election day? Grrr! ☺

Dear all

Thanks for your RSVPs for s 47F lunch in November.

We are
really excited so many people are coming along - if you responded with
a very regrettable decline, please ignore this email... If you are still unsure
this may help with your decision!

We've
had some feedback that it would makes things easier for travel and
work plans to make the lunch on s 47F. This
means looking at flights over on the Friday s 47F

Attachments: MAVERICKS AND TRUMP.doc

Folks a short note on the subject of the moment, that is a bit diff from others I have read. People are so nicey-nicey with PC now that we forget all reality, and especially, what we owe to strange mavericks, and the necessity of peasants' revolts from time to time. Cracking eggshells is not a well-ordered activity, even less so when Trump has to crack almost the entirety of USA and Western commentary. Some rotten egg, some cracking.

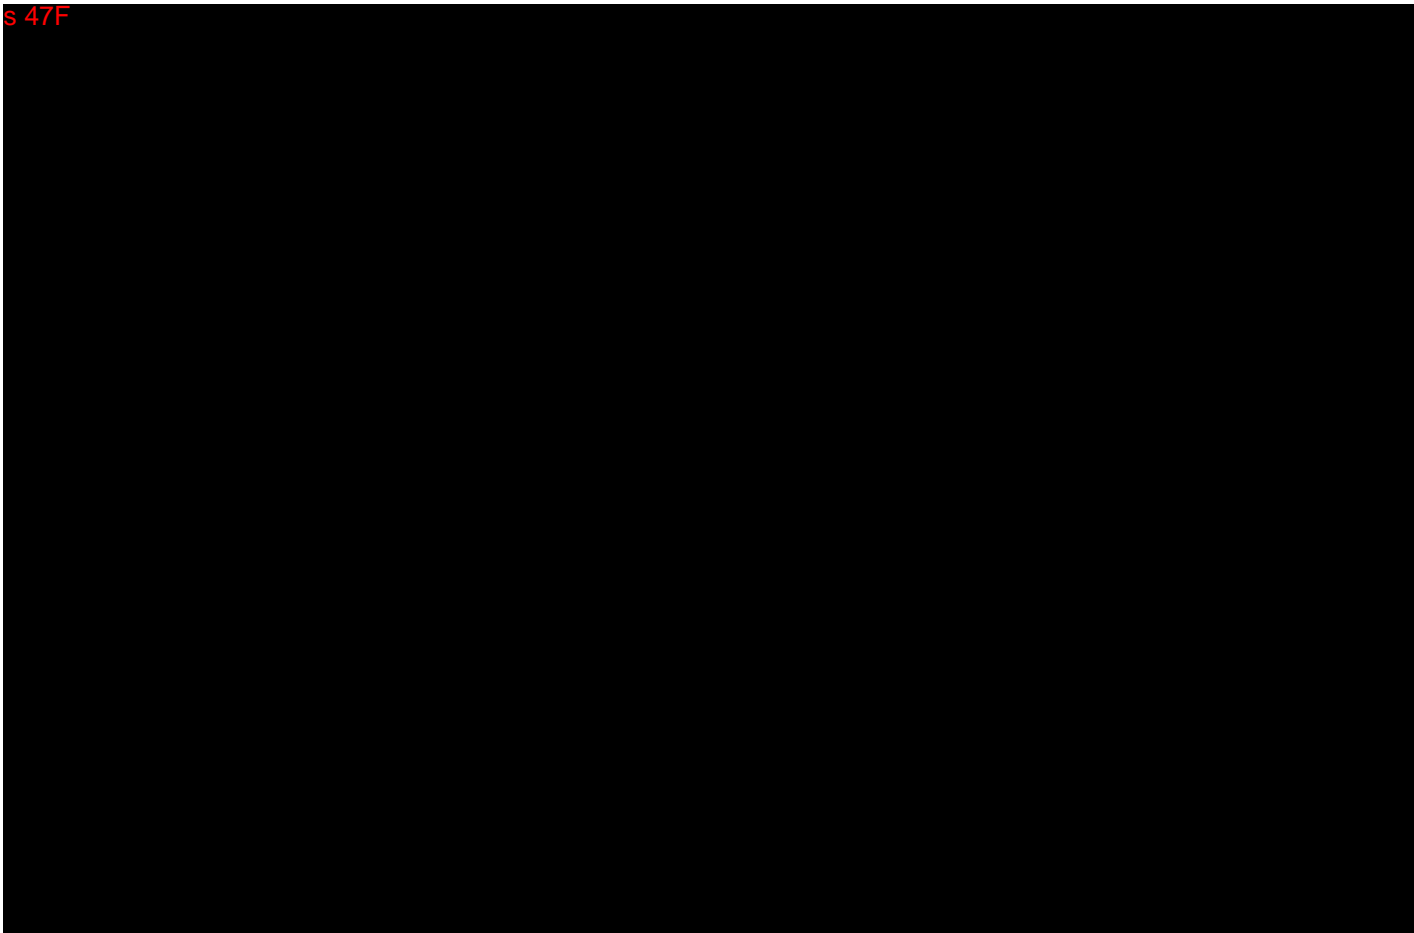

Kindest

Ladies and Gentlemen,

Earlier this year I promised to take you all s 47F

I am emailing to make good on that promise, if you wish to take it up, and to find a date s 47F

I'm mindful that you are probably already planning a Christmas break up, so perhaps I could suggest we could fit in with that.

Let me know your thoughts.

Best,

Tim

Is magnificent and brutal at the same time.

It's genuinely horrifying to read.
