Dear Hollie H

**NOTICE OF DECISION UNDER SECTION 24A
OF THE FREEDOM OF INFORMATION ACT 1982**

I refer to your request of 1 December 2020 to the Department of Health (the department) seeking access under the *Freedom of Information Act 1982* (Cth) (the Act) to:

documents held within the Department of Health that show the evidence of the isolation of the SARS-Cov-2 virus. To eliminate the possibility of contamination, I ask that these documents show the virus has been isolated from only the sample of a symptomatic patient of COVID 19, where it was not first combined with any other source of genetic material (not limited to but by way of example; monkey kidney cells/vero cells or liver cancer cells.)

FOI decision

I am authorised under subsection 23(1) of the Act to make decisions in relation to Freedom of Information requests. I am writing to notify you of my decision in response to your request.

Appropriate steps have been taken to find the documents referred to in your request including consultation with relevant departmental officers.

I am satisfied, on the basis of the consultation undertaken, that the department does not hold any documents referred to in your request.

As a consequence, relying on section 24A of the Act, I cannot provide access to the documents you requested.

The Medical Journal of Australia (MJA) has published a paper on the isolation of SARS-CoV-2 at VIDRL. This paper describes the process of the inoculation of Vero/hSLAM cells from a nasopharyngeal swab, which led to the isolation of the SARS-CoV-2 virus in culture. The MJA paper is available here:
