Dear Mr Fairless

**Re Your FOI Request No. LS5102 for IT Network Documentation - IPv4/v6 Public Facing addresses**

I refer to your email dated 17 July 2014 4:42 PM in which you request ('FOI Request') for access to documents relating to IT Network Documentation - IPv4/v6 Public Facing addresses under the *Freedom of Information Act 1982* (the 'FOI Act').

2 I have taken your request to be for:

- records detailing the IPv4 (and if relevant, IPv6) addresses used to access the public internet from within the AEC network, being the public facing addresses of your private network that are used to access the general public internet that would be found in network documentation, or at the very least in configuration files of your router and firewall equipment.
- In addition, if it is such that a particular IP address serves a particular area within your department (for example, one IP address is used for Media Relations, while another is used for Ministerial Communications), I also request access to this information.

3 We received your request on 17 July 2014 and the 30 day statutory period for processing your request commenced from the day after that date. You should therefore expect a decision from us by 18 August 2014 (as a consequence of the processing period ending on a Sunday). The period of 30 days may be extended if we need to consult third parties, impose a charge or for other reasons. We will advise you if this happens.

**Notification of any charges**

4 You will be notified of any charges in relation to your request as soon as possible, before we process any requested documents or impose a final charge.
