Dear Mr Deprez

Re Your FOI Request No. LS5101 for testing, installation, and verification procedures and data for EasyCount Senate software

I refer to your email of 17 July 2014 11:36 PM in which you request ('FOI Request') for access to documents relating to testing, installation, and verification procedures and data for EasyCount Senate software under the *Freedom of Information Act 1982*.

SPECIFICATION OF THE FOI REQUEST

2   I have taken your FOI Request to be for the following documentation regarding the "EasyCount Senate (ECS)" software ("the software"):

- Manual and automated software testing procedures for verifying that the software is operating correctly, including manual test procedures, unit tests, integration tests, functional tests, end-to-end tests, table-driven tests, smoke tests, fuzz tests, installation and compatibility tests, regression tests, acceptance tests, performance tests and benchmarks, security tests, usability tests, network and connectivity tests, and concurrency tests;

- Data sets used in the software testing procedures listed above, including real or simulated sets of votes, and real or simulated preference distributions;

- Installation, maintenance, and troubleshooting instructions, including the specifications of computer hardware, network configuration, operating system and runtime environment configuration required for the testing procedures, and,

- User manuals, guides, usage instructions, and parameter specifications for use of the software.
