Ms Jen Baxter
Project Manager
CSIRO
Ecosciences Precinct
41 Boggo Road
Dutton Park QLD 4102

Dear Ms Baxter

Source S0013 – Request for approval under Regulation 51

Decision

Under Regulation 51 of the Australian Radiation Protection and Nuclear Safety Regulations 1999 (the Regulations), I have decided to approve your request to conduct further pre-characterisation work and upgrades to the hangar access door at Woomera Test Range. No amendment to the licence is necessary.

Statement of reasons

I have approved your request after considering the following matters and evidence:

- My regulatory officers assessed your supplied risk assessments, treatment plans, radiation protection plan and effective control arrangements contained within the application and its attachments.
- Additional consideration was taken with regard to the unique environmental hazards posed by Woomera at this time of year which have the potential to adversely impact human performance.

ARPANSA's handling of the matter

My regulatory officers assessed the application and requested additional information to be supplied regarding risk assessments. On receipt of this additional information, my staff were able to determine that best practice was being applied for the proposed activity. My staff also acknowledged CSIRO's demonstrated capacity to comply through previous iterations of this essential activity conducted in early 2018.

Yours sincerely

s 47F - privacy

James Scott
Delegate of the CEO of ARPANSA
